Symbols glossary

- A** A: Product drying performance, measured from A+++ to D / G depending on the product family
-  Heavy duty cast iron pan stands: for maximum stability and strength.
-  Triple glazed doors: Number of glazed doors.
-  Circogas: In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.
-  Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.
-  Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.
-  Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.
-  Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.
- B** B: Product energy rating, measured from A+++ to D / G depending on the product family.
-  Air cooling system: to ensure a safe surface temperatures.
-  Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.
-  Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.
-  Lower heating element only: This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.
-  ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.
-  Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.
-  Rotisserie with half grill: These symbols allow use of the rotisserie with half grill.

|  <p>Top element only: This is used from above only, and is ideal for foods that are finished off with golden topping but do not require the full heat from the grill. Dishes such as Lasagne, potato topped foods, and cheese topped recipes benefit from this mode.</p> |  <p>Side lights: Two opposing side lights increase visibility inside the oven.</p> |
|  <p>Removable roof liner: This is a perfect solution that protects the upper part of the cavity of the oven from pollution. Easy to remove for cleaning, it can be washed in the dishwasher.</p> |  <p>The oven cavity has 4 different cooking levels.</p> |
|  <p>Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.</p> |  <p>Tilting grill: the tilting grill can be easily unhooked to move the heating element and clean the roof of the appliance in one simple step.</p> |
|  <p>Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.</p> |  <p>Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.</p> |
