## Symbols glossary

 Energy efficiency class A	 Power booster: option allows the zone to work at full power when very intense cooking is necessary.
 Installation in column: Installation in column.	 Air cooling system: to ensure a safe surface temperatures.
 Triple glazed doors: Number of glazed doors.	 Quadruple glazed: Number of glazed doors.
 Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength. Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking.	 Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.
 Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.	 Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.
 Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy. This symbol in gas ovens indicates the gas burner.	 Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly. The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.
 ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment.	 Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

 <p><b>Grill:</b> Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.</p>	 <p><b>Half grill:</b> For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.</p>
 <p><b>Rotisserie with half grill:</b> These symbols allow use of the rotisserie with half grill.</p>	 <p><b>Turbo:</b> the heat comes from 3 directions: above, below and from the back of the oven. The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.</p>
 <p><b>Top element only:</b> This is used from above only, and is ideal for foods that are finished off with golden topping but do not require the full heat from the grill. Dishes such as Lasagne, potato topped foods, and cheese topped recipes benefit from this mode.</p>	 <p><b>Overheat protection:</b> The safety system that automatically turns off the hob in case of overheating of the control unit.</p>
 <p><b>Induction:</b> The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.</p>	 <p><b>Side lights:</b> Two opposing side lights increase visibility inside the oven.</p>
 <p><b>Automatic opening:</b> some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.</p>	 <p><b>PYROLYSIS - AUTOMATIC CLEANING FUNCTION:</b> the oven heats up to a temperature approaching 500 ° C and chars grease and food residues into a fine ash that can be easily wiped off with a damp cloth. At such a high temperature, the door locks automatically for safety, while the temperature of the door remains controlled so it is safe to touch User adjustable function based on the level of dirt present in the oven.</p>
 <p><b>Indication of residual heat:</b> After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.</p>	 <p><b>Removable roof liner:</b> This is a perfect solution that protects the upper part of the cavity of the oven from pollution. Easy to remove for cleaning, it can be washed in the dishwasher.</p>
 <p>The oven cavity has 4 different cooking levels.</p>	 <p><b>Electronic control:</b> Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.</p>
 <p><b>Tilting grill:</b> the tilting grill can be easily unhooked to move the heating element and clean the roof of the appliance in one simple step.</p>	 <p>The capacity indicates the amount of usable space in the oven cavity in litres.</p>
 <p>The capacity indicates the amount of usable space in the oven cavity in litres.</p>	 <p>4.3 inch display with LED technology, usability with knobs + 3 touch keys</p>
 <p>Knobs control</p>	

## Benefit (TT)

---

### **Induction hob**

Induction offers fast cooking and precise temperature control

Through the use of suitable cookware, induction is easy to use and maintain, safe and responsive.

### **Pyrolysis**

Easy oven cleaning thanks to special pyrolytic function

### **Touch control**

Easy and intuitive timer setting with a single touch

### **Drawer storage compartment**

More space thanks to the lower drawer compartment, ideal for storing accessories or cooking utensils

### **True-convection**

The best cooking performances guaranteed by ventilated circular flow

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

### **Multilevel cooking**

Several cooking levels allow maximum flexibility of use

### **Multilevel halogen light**

Internal halogen lighting on different levels guarantees excellent visibility

### **Tangential cooling**

New cooling system with tangential fan and airflow from the door to the splashback

### **Adjustable height**

Cooker top flushed with the working area thanks to adjustable feet

### **AirFry (AIRFRY optional accessory)**

Lighter and tastier food thanks to airfry basket (optional accessory)

### **Cold door**

During any function, the external door glass is cold, avoiding any risk of burns

### **Pizza stone (optional accessory)**

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)

---

**BBQ (optional accessory)**

Barbecue cooking directly in the oven with the double-sided grill (BBQ optional accessory)

**Isothermic Cavity**

The best cooking performance at the highest energy efficiency

**Single turbine**

The oven has a fan equipped with a circular heating element allowing cooking with rotating heat
