## Symbols glossary

 <p>Heavy duty cast iron pan stands: for maximum stability and strength.</p>	 <p>Installation in column: Installation in column</p>
 <p>Air cooling system: to ensure a safe surface temperatures.</p>	 <p>Triple glazed doors: Number of glazed doors.</p>
 <p>Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.</p>	 <p>Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.</p>
 <p>Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.</p>	 <p>Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.</p>
 <p>Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.</p>	 <p>Lower heating element only: This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.</p>
 <p>Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.</p>	 <p>ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.</p>
 <p>Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.</p>	 <p>Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.</p>
 <p>Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.</p>	 <p>Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.</p>

|---|---|
|  Side lights: Two opposing side lights increase visibility inside the oven.   |  Automatic opening: some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently. |
|  Removable roof liner: This is a perfect solution that protects the upper part of the cavity of the oven from pollution. Easy to remove for cleaning, it can be washed in the dishwasher.                         |  The oven cavity has 4 different cooking levels.   |
|  Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings. |  The capacity indicates the amount of usable space in the oven cavity in litres.   |

## Benefit (TT)

---

### **Gas hob**

Gas provides constant control of the heat source, with an immediate change in temperature

Equipped with a thermocouple, the gas supply is cut off if the flame is extinguished for greater safety

### **Ever Clean Enamel**

Easy oven cleaning thanks to special pyrolytic enamel

### **Touch control**

Easy and intuitive timer setting with a single touch

### **Drawer storage compartment**

More space thanks to the lower compartment, ideal for storing accessories or cooking utensils

### **True-convection**

The best cooking performances guaranteed by ventilated circular flow.

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

### **Multilevel cooking**

Several cooking levels allow maximum flexibility of use

### **Tangential cooling**

New cooling system with tangential fan and airflow from the door to the splashback

### **Adjustable height**

Cooker top flushed with the working area thanks to adjustable feet

### **Isothermic Cavity**

The best cooking performance at the highest energy efficiency

### **AirFry (AIRFRY optional accessory)**

Lighter and tastier food thanks to airfry basket

### **Cold door**

During any function, the external door glass is cold, avoiding any risk of burns

### **Pizza stone (optional accessory)**

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)

---

**BBQ (optional accessory)**

Barbeque cooking directly in the oven with the double-sided grill

**Single turbine**

The oven has a fan equipped with a circular heating element allowing cooking with rotating heat
