3743

Kit of 4 flat aluminum trays EN 600×400

3751

Flat perforated aluminium tray (4pcs)

3805

Kit of 4 chrome-plated wire grids EN $600\times400~\text{mm}$

3810

Kit of 4 wave wire grids for baguettes EN 600×400 mm

3927

Air flow reducer kit for ovens ALFA410, 420, 625, 1035

RGN11-1035-2

Support rack for GN 1/1 flat trays, suitable for ALFA1035 models

RUTVL

Set of 4 wheels, fits all professional oven

T11TH20

GN1/1 non-stick tray, 20 mm height

T11TH40

GN1/1 non-stick tray, 40 mm height

T11XH20

Aluminium GN1/1 tray, 20 mm height

T11XH65

GN1/1 aluminium tray, 65 mm height

TF11XH2

GN 1/1 perforated aluminium tray, 20 mm height

TMF11TH2

GN 1/1 non-sticking microperforated tray, 20 mm height

Benefit (TT)

Mechanical control panel

Ease of use and effortless control of the essential cooking parameters

The control panel, equipped with practical knobs, allows for simple, intuitive, and effortless management of the main functions. Using the buttons, you can adjust the cooking time, temperature, and, in selected models, the level of humidification. By turning the knob to position 1, steam will be delivered until it is released. In multifunction ovens with a mechanical control panel, there is also a dedicated button for selecting different oven functions based on the desired cooking mode.

Hinged opening

Easily accessible glass for effortless maintenance and cleaning

The glass panels are designed to be easily accessible and inspectable, ensuring great convenience during cleaning and maintenance operations. This feature significantly simplifies the process, making it quick and efficient, while ensuring that every intervention can be carried out with maximum comfort and complete safety.

Humidity management

Impeccable cooking thanks to precise humidity control

Thanks to the effective management of small amounts of humidity, perfect browning can be achieved while maintaining the product's softness and promoting the development of its internal structure. Different humidity levels can be set, which determine the frequency of activation cycles. Each cycle consists of two seconds of water vapour spraying inside the cooking chamber, followed by a 15-second pause.
