### **Compatible Accessories**

BN620-1

Enamelled tray suitable for 45 cm and 60 cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

### BNP608T

Teflon-coated tray, 8 mm depth, to be placed on the grid

### GTT

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### SCRP

Non-scratch hob scraper - suitable for induction and ceramic hobs

### **BN640**

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

### GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### KITP60X9

Splashback, stainless steel, suitable for 60X60cm Concerto cookers with pyro and MF oven

SFLK1 Child lock

### SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

### STONE

Rectangular refractory stone Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits Dimensions:L42 x H1,8 x P37,5 cm.

A D

Air cooling system: to ensure a safe surface temperatures.

Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking

E Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

- Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.
  - Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.

Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.

| Fan assisted base: the mix of fan and lower<br>heating element alone allows to finish cooking<br>foods already cooked on the surface but not<br>internally more quickly. This system is<br>recommended to finish cooking foods that are<br>already well cooked on the surface, but not<br>internally, which therefore require a mederate |
|--|
| already well cooked on the surface, but not<br>internally, which therefore require a moderate<br>higher heat. Ideal for any type of food.  |

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment

Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

# •ss•smeg

|      | Turbo: the heat comes from 3 directions: above,<br>below and from the back of the oven The fan is<br>active. It allows quick cooking, even on several<br>shelves without mixing the aromas. Ideal for<br>large volumes or foods that require intense<br>cooking.   | STOP<br>°C ∓ | Overheat protection: The safety system that<br>automatically turns off the hob in case of<br>overheating of the control unit.   |
|------|--|--------------|---|
| 側    | Induction: The work of these hobs is based on the<br>principle of electromagnetic induction. The heat is<br>generated directly in the bottom of the pan<br>during its contact with the hob.  | 旦            | All glass inner door: All glass inner door, a single<br>flat surface which is simple to keep clean.   |
|      | The inner door glass: can be removed with a few quick movements for cleaning.  | 0.<br>0      | Side lights: Two opposing side lights increase visibility inside the oven.  |
| De   | Automatic opening: some models have Automatic<br>opening door when the cycle is finished which is a<br>perfect solution for handle-less kitchen units as no<br>handle is needed. For safety reasons, the door<br>locks automatically when the machine is in use to<br>avoid it being opened inadvertently. | P            | PYROLYSIS - AUTOMATIC CLEANING<br>FUNCTION: the oven heats up to a temperature<br>approaching 500 ° C and chars grease and food<br>residues into a fine ash that can be easily wiped<br>off with a damp cloth. At such a high<br>temperature, the door locks automatically for<br>safety, while the temperature of the door remains<br>controlled so it is safe to touch User adjustable<br>function based on the level of dirt present in the<br>oven. |
| łł   | Indication of residual heat: After the glass<br>ceramic hob is switched off the residual heat<br>indicator shows which of the heating zones still<br>remains hot. When the temperature drops below<br>60 ° C, the indicator goes out.  | <u>.5</u>    | The oven cavity has 5 different cooking levels.   |
|      | Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.  | $\bigcirc$   | Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.  |
|      | TWIN_ZONE_72dpi  | 70 IR        | The capacity indicates the amount of usable space in the oven cavity in litres.   |
| DIGI | 4.3 inch display with LED technology, usability<br>with knobs + 3 touch keys   |              |   |

## Benefit (TT)

### Induction hob

Induction offers fast cooking and precise temperature control

Through the use of suitable cookware, induction is easy to use and maintain, safe and responsive.

### Pyrolysis

Easy oven cleaning thanks to special pyrolytic function

### **Touch control**

Easy and intuitive timer setting with a single touch

#### Storage compartment

More space thanks to the lower compartment, ideal for storing accessories or cooking utensils

#### **True-convection**

The best cooking performances guaranteed by ventilated circular flow

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

### Multilevel cooking

Several cooking levels allow maximum flexibility of use

### Multilevel halogen light

Internal halogen lighting on different levels guarantees excellent visibility

### **Removalble inner glass**

Internal door glasses are easily removable for complete cleaning

### **Tangential cooling**

New cooling system with tangential fan and airflow from the door to the splashback

#### **Telescopic guides**

Easy extraction and safe insertion of trays into the oven thanks to telescopic guides

### Adjustable height

Cooker top flushed with the working area thanks to adjustable feet

### Cold door

During any function, the external door glass is cold, avoiding any risk of burns

# -ss-smeg

### AirFry (AIRFRY optional accessory)

Lighter and tastier food thanks to airfry basket (optional accessory)

### Isothermic Cavity

The best cooking performance at the highest energy efficiency

### BBQ (optional accessory)

Barbecue cooking directly in the oven with the double-sided grill (BBQ optional accessory)

### Pizza stone (optional accessory)

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)

### Single turbine

The oven has a fan equipped with a circular heating element allowing cooking with rotating heat
