Yes

Yes Yes

Circular heating element 2000 W - Power Grill type Electric

Options Main Oven

Timer	Yes	Minimum Temperature	50 °C
End of cooking acoustic alarm	Yes	Maximum temperature	260 °C

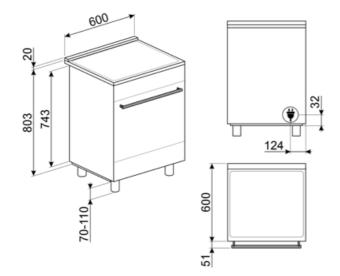

Accessories included for Main Oven & Hob

Rack with back and side stop	2	Telescopic Guide rails, partial Extraction	1
40mm deep tray	1	Meat Probe	1
Grill mesh	1		

Electrical Connection

Electrical connection rating	10000 W	Type of electric cable installed	Yes, Single phase
Current	44 A	Type of electric cable	Yes, Double and Three
Voltage	220-240 V		Phase
Voltage 2 (V)	380-415 V	Frequency	50/60 Hz
		Terminal block	5 poles

Compatible Accessories

BN620-1

Enamelled tray, 20mm deep

BNP608T

Teflon-coated tray, 8mm depth, to be placed on the grid

**Totally extractable telescopic guides

(1 level)** Extraction: 433 mm Material:

SCRP

Induction and ceramic hobs and teppanyaki scraper

Stainless steel AISI 430 polished

Material: Stainless steel AISI 430 polished

GTP

BN640

Enamelled tray, 40mm deep

**Partially extractable telescopic

guides (1 level)** Extraction: 300 mm

KITP60X9

Splashback, 90 cm, stainless steel, suitable for pyrolytic Concerto cookers

SFLK1

Child lock

STONE

Rectangular refractory stone PPR2. Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies. flans or biscuits Dimensions:L42 x H1,8 x P37,5 cm.

SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

Symbols glossary

ს	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.	A P	A: Product drying performance, measured from A+++ to D / G depending on the product family
	Installation in column: Installation in column	<u></u>	Air cooling system: to ensure a safe surface temperatures.
DIGI		4	Quadruple glazed: Number of glazed doors.
Ä	Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.	۲	Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.
*)	Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.	(%)	Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.
()	Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.	8	Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.
ECO	ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.	\sim	Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.
***	Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.	<i>(%</i>)	Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.
	Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.	STOP °C ∓	Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

•ss•smeg

-			
	Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.	旦	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.
J	The inner door glass: can be removed with a few quick movements for cleaning.	0	Side lights: Two opposing side lights increase visibility inside the oven.
D	Automatic opening: some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.	P	Pyrolitic: Pyrolitic cleaning cycles can be selected as necessary to automatically clean the oven interior.
┠┥	Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.	<u>.5</u>	The oven cavity has 5 different cooking levels.
	Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.	\bigcirc	Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.
	TWIN_ZONE_72dpi	70 It	The capacity indicates the amount of usable space in the oven cavity in litres.

Benefit (TT)

Induction hob

Induction offers fast cooking and precise temperature control

Through the use of suitable cookware, induction is easy to use and maintain, safe and responsive

Pyrolysis

Easy oven cleaning thanks to special pyrolytic function

Touch control

Easy and intuitive timer setting with a single touch

Storage compartment

More space thanks to the lower compartment, ideal for storing accessories or cooking utensils

True-convection

The best cooking performances guaranteed by ventilated circular flow.

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

Multilevel cooking

Several cooking levels allow maximum flexibility of use

Multilevel halogen light

Internal halogen lighting on different levels guarantees excellent visibility

Removalble inner glass

Internal door glasses are easily removable for complete cleaning

Tangential cooling

New cooling system with tangential fan and airflow from the door to the splashback

Telescopic guides

Easy extraction and safe insertion of trays into the oven thanks to telescopic guides

Isothermic Cavity

The best cooking performance at the highest energy efficiency

Adjustable height

Cooker top flushed with the working area thanks to adjustable feet

BBQ (optional accessory)

Barbeque cooking directly in the oven with the double-sided grill

Pizza stone (optional accessory)

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)

Cold door

During any function, the external door glass is cold, avoiding any risk of burns

AirFry (AIRFRY optional accessory)

Lighter and tastier food thanks to airfry basket

Single turbine

The oven has a fan equipped with a circular heating element allowing cooking with rotating heat
