

C6IPXT2

Cooker size	60x60 cm
N. of cavities with energy label	1
Cavity heat source	Electric
Hob type	Induction
Type of main oven	Thermo-ventilated
Cleaning system main oven	Pyrolytic
EAN code	8017709330934
Energy efficiency class	A

Aesthetics

			
Aesthetics	Classic	Slider	Red
Series	Concert	Control knobs	Smeg Classic
Design	Standard	Controls colour	Stainless steel
Colour	Stainless steel	No. of controls	6
Finishing	Gloss	Serigraphy colour	Black
Command panel finish	Enamelled metal	Display	Touch
Logo	Silk screen	Door	Full glass
Logo position	Facia below the oven	Glass type	Black
Upstand	Yes	Handle	Smeg Classic
Hob colour	Stainless steel	Handle Colour	Brushed stainless steel
Type of control setting	Touch control	Feet	Black

Main Oven Technical Features

No. of lights	1	Removable inner door	Yes
Fan number	1	Total no. of door glasses	4
Net volume of the cavity	70 litres	No. of thermo-reflective door glasses	3
Gross volume, 1st cavity	79 l	Safety Thermostat	Yes
Cavity material	Easy clean enamel	Heating suspended when door is opened	Yes
Shelf positions	5	Cooling system	Tangential
Type of shelves	Metal racks	Door Lock During Pyrolysis	Yes
Light type	Halogen	Usable cavity space dimensions (HxWxD)	360X460X425 mm
Light power	40 W	Temperature control	Electro-mechanical
Cooking time setting	Start and Stop	Lower heating element power	1200 W
Light when oven door is open	Yes	Upper heating element - Power	1000 W
Door opening	Flap down	Large grill - Power	2700 W
Removable door	Yes	Circular heating element - Power	2000 W
Full glass inner door	Yes	Grill type	Electric

Options Main Oven

Timer	Yes	Minimum Temperature	50 °C
End of cooking acoustic alarm	Yes	Maximum temperature	260 °C

Accessories included for Main Oven & Hob

Chrome shelf with back and side stop	2	Grill mesh	1
40mm deep tray	1	Telescopic Guide rails, partial Extraction	1

Electrical Connection

Max Power Draw	10000 W	Type of electric cable	Yes, Single phase
Current	44 A	Additional connection modalities	Yes, Double and Three Phase
Voltage	220-240 V	Frequency	50/60 Hz
Voltage 2 (V)	380-415 V	Terminal block	5 poles

Compatible Accessories

BN620-1

Enamelled tray, 20mm deep

BNP608T

Teflon-coated tray, 8mm depth, to be placed on the grid

GTT

Totally extractable telescopic guides (1 level) Extraction: 433 mm Material: Stainless steel AISI 430 polished

SCRP

Induction and ceramic hobs and teppanyaki scraper

SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

BN640

Enamelled tray, 40mm deep

GTP

Partially extractable telescopic guides (1 level) Extraction: 300 mm Material: Stainless steel AISI 430 polished

KITP60X9

Splashback, 90 cm, stainless steel, suitable for pyrolytic Concert cookers

SFLK1

Child lock

STONE

Rectangular refractory stone. Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits Dimensions: L42 x H1,8 x P37,5 cm.

Symbols glossary

	A: Product drying performance, measured from A+++ to D / G depending on the product family		Power booster: option allows the zone to work at full power when very intense cooking is necessary.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		Installation in column: Installation in column
	Air cooling system: to ensure a safe surface temperatures.		Quadruple glazed: Number of glazed doors.
	ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.		Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.
	Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.		Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.
	Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.		Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.
	ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.		Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.
	Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.		Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

	<p>Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.</p>		<p>Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.</p>
	<p>Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.</p>		<p>All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.</p>
	<p>The inner door glass: can be removed with a few quick movements for cleaning.</p>		<p>Side lights: Two opposing side lights increase visibility inside the oven.</p>
	<p>Automatic opening: some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.</p>		<p>Pyrolitic: Pyrolitic cleaning cycles can be selected as necessary to automatically clean the oven interior.</p>
	<p>Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.</p>		<p>The oven cavity has 5 different cooking levels.</p>
	<p>Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.</p>		<p>Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.</p>
	<p>TWIN_ZONE_72dpi</p>		<p>The capacity indicates the amount of usable space in the oven cavity in litres.</p>
	<p>The touch timer display or DigiScreen guarantees simple functionality. They display the time, set programmed cooking and the minute minder timer.</p>		<p>Touch control</p>
