Symbols glossary

4 stars freezing compartment for better food preservation.

The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LCD display: to optimize performance and simplify the use of the appliance.

Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.

Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working.

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Built-in niche

No Frost: The No Frost and Frost free systems prevent ice from forming so that no defrosting is required.
