- |   |  |   |  |
|---|--|---|--|
|   | The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.            |  | Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.                                       |
|   | LCD display: to optimize performance and simplify the use of the appliance.  |  | Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.               |
|   | Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge. |  | Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.                      |
|   | LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.                      |  | Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption. |
|   | Multiflow Cooling System: the Multiflow ventilation system allows an even distribution of cool air around the fridge cabinet.              |  | Built-in niche   |
