### Not included accessories

#### **TPKTR9**

Stainless steel teppanyaki plate, suitable for Victoria TR9, Master and Sinfonia cookers

#### KITH95CPF9

Height extension kit with plinth, (950mm), three sides, black with feet, suitable for CPF9 Portofino and Sinfony C9 cookers

#### **AIRFRY**

Air fryer rack AIRFRY. Ideal for recreating traditional frying in the oven, but with fewer calories and less fat. It allows you to cook quickly and simply dishes such as French fries, fried vegetables and fish, ensuring perfect browning and crispiness.

SFLK1

Child lock

#### **GTP**

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

#### KIT600C92PX

Cover strip for hob back side, suitable for 90cm Symphony cooker with pyro

#### **PRTX**

Refractary pizza stone with handles. D=35cm Not suitable for microwave ovens. Suitable for gas ovens, to be put on the griddle.

#### BNP608T

Teflon-coated tray, 8mm depth, to be placed on the grid

#### **BGTR9**

Cast iron grill plate suitable for 90 cm Victoria, 60 and 90 cm Master and Sinfonia cookers

#### **KITPBX**

Height reduction feet (850mm), st/steel, for Sinfonia and Master cookers (845-856mm)

## KITH900CPF9

Plinth, 90cm, three sides, black, suitable for CPF9 Portofino or Sinfony C9 cookers

#### BN620-1

Enamelled tray suitable for 45cm and 60cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

#### **BBO**

Double sided plate BBQ. Suitable for recreating succulent and crispy dishes in the oven with the typical taste of grilled cooking. The ribbed side is particularly suitable for meats and cheeses. The smooth side for fish, seafood and vegetables.

#### **PALPZ**

Pizza shovel with folding handle. Dimensions L31.5 x H32.5 cm. Easy and convenient to use and store. Perfect for serving pizza, bread and savory pastries in a safe and professional way.

#### KITC9X9

Splashback, 90x75 cm, stainless steel, suitable for Master cookers

#### **GTT**

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

#### **BN640**

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

#### SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

## Symbols glossary (TT)

A: Product drying performance, measured from A+++ to D / G depending on the product family

Heavy duty cast iron pan stands: for maximum stability and strength.

Air cooling system: to ensure a safe surface temperatures.

Triple glazed doors: Number of glazed doors.

Quadruple glazed: Number of glazed doors.

Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking

Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.

Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.

Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner

Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.

ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment

	Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.	~	Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.
*	Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.	<u>®</u>	Turbo: the heat comes from 3 directions: above, below and from the back of the oven The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.
月	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.		The inner door glass: can be removed with a few quick movements for cleaning.
ġ Ö	Side lights: Two opposing side lights increase visibility inside the oven.	Þ	PYROLYSIS - AUTOMATIC CLEANING FUNCTION: the oven heats up to a temperature approaching 500 °C and chars grease and food residues into a fine ash that can be easily wiped off with a damp cloth. At such a high temperature, the door locks automatically for safety, while the temperature of the door remains controlled so it is safe to touch User adjustable function based on the level of dirt present in the oven.
<u>.4</u>	The oven cavity has 4 different cooking levels.	.5	The oven cavity has 5 different cooking levels.

entirely.

UR

3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.

Electronic control: Allows you to maintain

temperature inside the oven with the precision 2-

Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.

Telescopic rails: allow you to pull out the dish and

check it without having to remove it from the oven

The capacity indicates the amount of usable space in the oven cavity in litres.

The capacity indicates the amount of usable space in the oven cavity in litres.
