Symbols glossary

ADA-compliant home appliances are designed to meet the accessibility standards outlined in the Americans with Disabilities Act (ADA). These appliances are made with features that make them more accessible to individuals with disabilities, particularly those with mobility, vision, or hearing impairments.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.

Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Air plus: keeps food fresher for longer.

Slot-in: The refrigerators with Slot-in opening can be perfectly integrated into the furniture structure, as the doors open at 90° do not go beyond the side of the product. In case of installation next to the wall, it will be necessary to consider the dimensions of the handle in order to open the door at 90 °.

The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.

Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working.

Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.

SABBATH: function that allows to cook food respecting Judaism's day of rest provisions.
