| Timer                         | Yes | Minimum Temperature | 120 °F |
| End of cooking acoustic alarm | Yes | Maximum temperature | 500 °F |

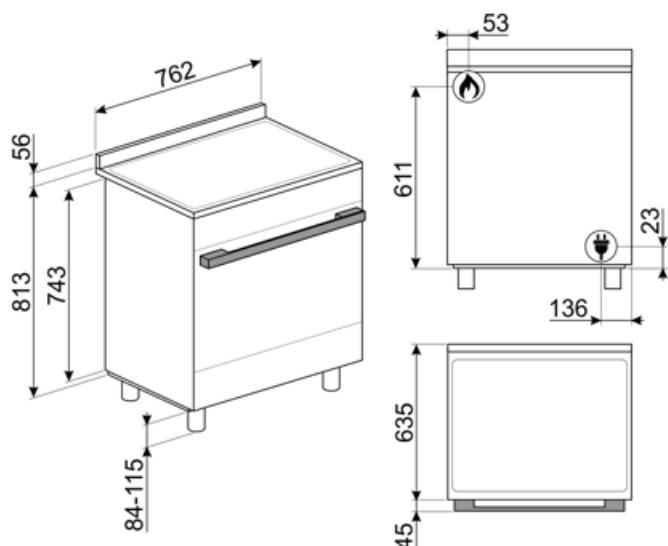

## Accessories included for Main Oven & Hob

|                                   |   |                                            |   |
|-----------------------------------|---|--------------------------------------------|---|
| Cast iron wok support             | 1 | 20mm deep tray                             | 1 |
| Oven grid with stop, tray support | 1 | Grill mesh                                 | 1 |
| TOP Oven grid with back stop      | 1 | Telescopic Guide rails, partial Extraction | 1 |
| Wide baking tray                  | 1 |                                            |   |

## Electrical Connection

|                                  |                   |                           |          |
|----------------------------------|-------------------|---------------------------|----------|
| Electrical connection rating     | 3700 W            | Power supply cable length | 47 1/4 " |
| Current                          | 20 A              | Frequency                 | 60 Hz    |
| Circuit breaker                  | 20 A              | Terminal block            | 5 poles  |
| Voltage                          | 240/208 V         | Plug                      | No       |
| Type of electric cable installed | Yes, Double phase |                           |          |

## Compatible Accessories

**GT91P**

Partially extractable telescopic guides  
suitable for CPF30 cookers, USA

**SFLK1**

Child lock

**PALPZ**

Pizza shovel with folding handle.  
Dimensions L31.5 x H32.5 cm. Easy  
and convenient to use and store.  
Perfect for serving pizza, bread and  
savory pastries in a safe and  
professional way.

|    | Heavy duty cast iron pan stands: for maximum stability and strength.                                                                                                                                                                                                                                                                                     |    | Installation in column: Installation in column                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|    | Air cooling system: to ensure a safe surface temperatures.                                                                                                                                                                                                                                                                                               |    | Defrost by time: Manual defrost function. At the end of the set duration, the function stops.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|    | Triple glazed doors: Number of glazed doors.                                                                                                                                                                                                                                                                                                             |    | Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking |
|   | Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.                                                                                                                                                                                                                                       |   | Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.                                                                                                                                                                                                                                                                                                                    |
|  | Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers. |  | Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.                                                                                                                                                                                                                                                                                                                            |
|  | Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.                                                                                                         |  | Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.                                                                                                                                                                                                                                                                                                                                                                                                |
|  | Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.                                                                                                                            |  | Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.                                                                                                                                                                                                                                                                                                                                                                                    |

Fan grill: very intense heat coming only from above from a double heating element. The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.

All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.

Side lights: Two opposing side lights increase visibility inside the oven.

The oven cavity has 4 different cooking levels.

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

4.3 inch display with LED technology, usability with knobs + 3 touch keys

Pizza function: Specific function for cooking pizza in a pan. It allows to obtain a pizza that is soft inside and crispy outside with the topping perfectly cooked, not dry and not burnt.

The inner door glass: can be removed with a few quick movements for cleaning.

Automatic opening: some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.

Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.

Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.

Knobs control
