## Compatible Accessories

### AIRFRY

#### BN620-1

Enamelled tray suitable for 45cm and 60cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

#### BNP608T

Teflon bakplaat, 8mm diep

#### GTT

Volledig uitschuifbare telescopische rails (1 niveau) voor traditionele ovens (SF-).

#### KITH900CPF9

Plinth, 90cm, three sides, black, suitable for CPF9 Portofino or Sinfony C9 cookers

#### KITPBX

Height reduction feet (850mm), st/steel, for Sinfonia and Master cookers (845-856mm)

#### PALPZ

Pizzapallet inox met plooibaar handvat, 315x325 mm

#### SMOLD

Set van 7 siliconen vormen voor ijsjes, pralines, ijsblokjes of porties. -60°C tot 230°C.

### BBQ

Dubbelzijdig

#### BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

#### GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

#### KITC9X9-1

Splashback kit, st/steel, 90cm, suitable for Portofino Multifunction, Master and Sinfonia cookers

#### KITH95CPF9

Height extension kit with plinth, (950mm), three sides, black with feet, suitable for CPF9 Portofino and Sinfony C9 cookers

#### KITPD

Height extension black feet (950 mm), black, suitable for Master, Sinfonia and Portofino 90cm (914-968mm); Height extension black feet (900 mm), black, suitable for Concerto cookers with 850mm height (880-935mm)

#### SFLK1

Child lock

### STONE

Rectangular refractory stone Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits Dimensions: L42 x H1,8 x P37,5 cm.

**TPKCPF9**

Stainless steel teppanyaki plate,  
suitable for Portofino cookers

**WOKGHU**

Gietijzeren wok steun

## Symbols glossary

|                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                       |

|    | Heavy duty cast iron pan stands: for maximum stability and strength.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |                                                                                                                                                                                                                                                                                                                                                                                       |
|    | Installation in column: Installation in column                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |    | Knobs control                                                                                                                                                                                                                                                                                                                                                                         |
|    | Air cooling system: to ensure a safe surface temperatures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |    | Defrost by time: Manual defrost function. At the end of the set duration, the function stops.                                                                                                                                                                                                                                                                                         |
|    | DIGI screen display + bedieningsknoppen                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    | Triple glazed doors: Number of glazed doors.                                                                                                                                                                                                                                                                                                                                          |
|    | Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking |    | Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.                                                                                                                                                                                                                                                                    |
|  | Circogas: In gasovens verdeelt de ventilator de warmte snel en gelijkmatig over de ovenruimte, waardoor smaakoverdracht wordt vermeden bij het tegelijkertijd bereiden van een aantal verschillende gerechten. In elektrische ovens voltooit deze combinatie het koken van voedsel dat aan de oppervlakte klaar is, maar dat van binnen meer moet worden gekookt, zonder verder bruin te worden.                                                                                                                                                                                                                                                                                   |  | Alleen boven- en onder element: een traditionele kookmethode die het meest geschikt is voor losse items in het midden van de oven. de bovenkant van de oven zal altijd het heetst zijn. Ideaal voor gebraden vlees, fruitcake, brood etc.                                                                                                                                             |
|  | Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.                                                                                                                                                                                                                                                                                                                                                                                                                                   |  | Circulaire: De combinatie van de ventilator en het ronde element eromheen zorgt voor een hete lucht kookmethode. Dit biedt vele voordelen, waaronder geen voorverwarmen als de kooktijd meer dan 20 minuten bedraagt, geen smaakoverdracht bij het gelijktijdig bereiden van verschillende soorten voedsel, minder energie en kortere kooktijden. Geschikt voor alle soorten voedsel. |
|  | De combinatie van de grill, de ventilator en onderwarmte is interessant voor het bereiden van kleine hoeveelheden.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  | Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.                                                                                                                                                         |

**Half grill:** For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

**Light**

**All glass inner door:** All glass inner door, a single flat surface which is simple to keep clean.

**Side lights:** Two opposing side lights increase visibility inside the oven.

**The oven cavity has 4 different cooking levels.**

**Telescopic rails:** allow you to pull out the dish and check it without having to remove it from the oven entirely.

**Ultra rapid burners:** Powerful ultra rapid burners offer up to 5kw of power.

**The capacity indicates the amount of usable space in the oven cavity in litres.**

**Fan grill:** very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.

**Circulaire met bovenste en onderste elementen:** door het gebruik van de ventilator met beide elementen kan voedsel snel en effectief worden gekookt, ideaal voor grote stukken vlees die grondig moeten worden gekookt. Het biedt een vergelijkbaar resultaat als rotisserie, waarbij de warmte rond het voedsel wordt verplaatst in plaats van het voedsel zelf te verplaatsen, waardoor elke maat of vorm kan worden gekookt.

**The inner door glass:** can be removed with a few quick movements for cleaning.

**Automatic opening:** some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.

**The oven cavity has 5 different cooking levels.**

**Electronic control:** Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.

**Vapor Clean:** a simple cleaning function using steam to loosen deposits in the oven cavity.

**The capacity indicates the amount of usable space in the oven cavity in litres.**

---

## Benefit (TT)

---

### **Gas hob**

Gas provides permanent control of the heat source and the temperature change is immediate

Equipped with a thermocouple, the gas supply is cut off if the flame is extinguished for greater safety.

### **Vapor Clean**

By inserting water into a recess at the bottom of the cavity, steam is generated, which softens the residue and facilitates its removal

By inserting water into a recess at the bottom of the cavity, steam is generated, which softens the residue and facilitates its removal.

### **Touch control**

Easy and intuitive timer setting with a single touch

### **Storage compartment**

More space thanks to the lower compartment, ideal for storing accessories or cooking utensils

### **True-convection**

The best cooking performances guaranteed by ventilated circular flow

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

### **Multilevel cooking**

Several cooking levels allow maximum flexibility of use

### **Multilevel halogen light**

Internal halogen lighting on different levels guarantees excellent visibility

### **Removable inner glass**

Internal door glasses are easily removable for complete cleaning

### **Tangential cooling**

New cooling system with tangential fan and airflow from the door to the splashback

### **Electronic control**

Electronic control for timely temperature management and heat uniformity

### **Telescopic guides**

Easy extraction and safe insertion of trays into the oven thanks to telescopic guides

---

### **Isothermic Cavity**

The best cooking performance at the highest energy efficiency

### **Pizza stone (optional accessory)**

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)

### **BBQ (optional accessory)**

Barbeque cooking directly in the oven with the double-sided grill (BBQ optional accessory)

### **Adjustable height**

Cooker top flushed with the working area thanks to adjustable feet

### **AirFry (AIRFRY optional accessory)**

Lighter and tastier food thanks to airfry basket (optional accessory)

### **Cold door**

During any function, the external door glass is cold, avoiding any risk of burns

### **Single turbine**

The oven has a fan equipped with a circular heating element allowing cooking with rotating heat
