## Symbols glossary

 <p>Automatic merge of zones for a bigger area</p>	 <p>Energy efficiency class A</p>
 <p>Installation in column: Installation in column.</p>	 <p>Air cooling system: to ensure a safe surface temperatures.</p>
 <p>Defrost by time: Manual defrost function. At the end of the set duration, the function stops.</p>	 <p>Triple glazed doors: Number of glazed doors.</p>
 <p>ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.</p>	 <p>Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength. Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking.</p>
 <p>Circogas: In gasovens verdeelt de ventilator de warmte snel en gelijkmatig over de ovenruimte, waardoor smaakoverdracht wordt vermeden bij het tegelijkertijd bereiden van een aantal verschillende gerechten. In elektrische ovens voltooit deze combinatie het koken van voedsel dat aan de oppervlakte klaar is, maar dat van binnen meer moet worden gekookt, zonder verder bruin te worden.</p>	 <p>Ventilator met bovenste en onderste elementen: De elementen in combinatie met de ventilator zijn bedoeld om een meer gelijkmatige warmte te bieden, een methode die vergelijkbaar is met conventioneel koken, dus voorverwarmen is vereist. Het meest geschikt voor items die langzaam koken vereisen.</p>
 <p>Alleen boven- en onder element: een traditionele kookmethode die het meest geschikt is voor losse items in het midden van de oven. de bovenkant van de oven zal altijd het heetst zijn. Ideaal voor gebraden vlees, fruitcake, brood etc.</p>	 <p>Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy. This symbol in gas ovens indicates the gas burner.</p>
 <p>Circulaire: De combinatie van de ventilator en het ronde element eromheen zorgt voor een hete lucht kookmethode. Dit biedt vele voordelen, waaronder geen voorverwarmen als de kooktijd meer dan 20 minuten bedraagt, geen smaakoverdracht bij het gelijktijdig bereiden van verschillende soorten voedsel, minder energie en kortere kooktijden. Geschikt voor alle soorten voedsel.</p>	 <p>De combinatie van de grill, de ventilator en onderwarmte is interessant voor het bereiden van kleine hoeveelheden.</p>
 <p>Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.</p>	 <p>Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.</p>
