## Symbols glossary

|  |   |   |  |
|--|---|---|--|
|    | Air cooling system: to ensure a safe surface temperatures.  |    | Defrost by time: with this function the time of thawing of foods are determined automatically.   |
|    | A+: Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is guaranteed.  |    | Defrost by weight: With this function the defrosting time is determined  |
|    | Quadruple glazed: Number of glazed doors.   |    | Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.  |
|    | Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.  |    | Circogas: In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.   |
|  | Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.  |  | Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.  |
|  | Lower heating element only: This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.   |  | Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.   |
|  | ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.   |  | Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.  |
|  | Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities. |  | Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food. |

|  <p>Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.</p> |  <p>Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.</p>   |
|  <p>Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.</p>   |  <p>All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.</p>  |
|  <p>The inner door glass: can be removed with a few quick movements for cleaning.</p>  |  <p>Side lights: Two opposing side lights increase visibility inside the oven.</p>  |
|  <p>Pyrolytic: Pyrolytic cleaning cycles can be selected as necessary to automatically clean the oven interior.</p>  |  <p>Pyrolytic: The Eco pyrolytic cleaning function can be selected when the oven has a lighter build up of dirt. This function has a maximum duration of 1.5 hours.</p>   |
|  <p>Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted</p>   |  <p>Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.</p> |
|  <p>Sabbath: This function allows you to cook food whilst respecting the provisions of the Jewish day of rest.</p>   |  <p>The oven cavity has 5 different cooking levels.</p>   |
