

CPV315X

Product Family Drawer Commercial height 14 cm Sous-vide Vitality system Yes

Aesthetics

Classica Type of steel Brushed **Aesthetic** Colour Silk screen Stainless steel Logo **Finishing** Fingerproof Logo position Inside Material Stainless steel

Controls

Type of control setting Touch control

Program / Functions

Vacuum in container cycle

Preservation cycle

Chef function

Welding

Technical Features

Lid material

Push-pull

Opening mechanism Base material

Stainless steel 304

Tempered glass with frame

Safety solenoid valve anti oil reflux

Yes

SMEG SPA 27/11/2025

65° +/- 3° Lid opening **Drawer stabilisation** Yes device Drawer maximum 453 +/- 2 mm protrusion Max weight allowance 15 kg Maximum drawer 48 kg loading weight Capacity 6,5 I Pump flow 4 m³/h

Dehumidification pump Yes, automatic cycle Enabling vacuum bar 260 mm lenght Removable enabling Yes vacuum bar Welding type Double-phase 1' - 1'20" Preservation cycle duration Reachable vacuum 2-10 millibar (99,9%) Vacuum sensor Yes, accuracy 10 mbar 20x30 V-bags, 25x35 V-Accessories included

Bags

135 mm

Electrical Connection

Plug (F;E) Schuko
Nominal power 240 W
Current 1 A

Voltage (V) 220-240 V **Frequency (Hz)** 50-60 Hz

Logistic Information

Width (mm) 597 mm Product Height (mm)
Depth (mm) 570 mm

Symbols glossary

The Chef function alternates compression and decompression cycles and speeds up some operations, such as marinade or infusion, that otherwise would require a lot of time.

Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.

Preservation vacuum bags. These bags endure temperatures from -25°C to 70°C (for 2 hours) or 100°C (for 15 minutes). Suitable for pantry, refrigerator and freezer storage, they cannot be used for vacuum cooking.

The vacuum in bag function guarantees to create vacuum into bags choosing among three levels. It is also possible to set the 0 level to seal the bag without creating the vacuum.

The stabilization device maintains the drawer open when used, avoiding closing it accidentally.

Sous-vide cooking bags. These bags endure a maximum temperature of 85°C (for 75 hours), 100°C (for 4 hours) or 121°C (for 30 minutes). Suitable for pantry and refrigerator storage, they cannot be storage in the freezer.

The vacuum in container function guarantees to create vacuum into glass or plastic containers choosing among three different levels. Use only certificate containers suitable for vacuum and able to resist to a 99,9% vacuum.

Setting the highest vacuum in bag/container level, it is reached a 99,9% vacuum.

The vacuum sensor guarantees the achievement of the maximum vacuum connected to the level set. If the value is not reached, the bag is not sealed.

The machine can be set at three different sealing levels. Setting the maximum level is possible to seal more bags at the same time with a unique cycle.

The machine carries out a double phase welding which guarantees to seal dirty and oily bags as well.
