Symbols glossary

Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.

Energy efficiency class B

The Dry Assist + option, in addition to saving energy, ensures perfect drying of the dishes by opening the door automatically at the end of the wash cycle.

FlexiZone: The $\frac{1}{2}$ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.

The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.

Crystals: The Crystals programme is dedicated to delicate dishes such as glasses and china.

Soak programme: The soak programme provides a rinse to prevent dirt from drying.

Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.

Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.

FlexiDuo: The FlexiDuo 3rd cutlery basket allows you to arrange cutlery or small cups, ladles, or bulky utensils however you like: it consists of two separate and moveable modules.

The new ExtraGlide guide system, available on top of the range models, makes the second basket even smoother and softer. In fact, it facilitates the extraction of the introduction, even at full load and, for the greater excursion, the insertion of crockery is also facilitated in the rear part.

Noise Level: Excellent insulation and special devices keep noise to a minimum.

Auto 45°- 65°: The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.

Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.

Normal programme: The normal programme is suitable for normal degrees of dirt for everyday use.

Rapid 27 Mins: The rapid 27 mins quick program takes just 27 minutes to wash a load.

The symbols show the number of plate settings of the dishwasher.

System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.
