Symbols glossary

A+++: Appliances with this symbol can reduce energy consumption by a further 30% from the standard A energy rating.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LCD display: to optimize performance and simplify the use of the appliance.

This shows the amount of laundry that can be inserted into the tumble dryer in KG.

End: Show the stage at which the program is in progress: the program has finished.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.

Baby: a cycle which ensures a high efficiency int he rinse to remove all trees of detergent from the tissues and protect the delicate children's skins.

Specific for child garments

Extra drying for cotton

Specific for daily drying of cotton or synthetic garments

For high speed centrifuged jeans

The noise level is reduced at the lowest level

Short ventilation for cotton and linen garments without blowing hot air

For synthetic fabrics, ironing in not required

Selection of timed cycles at low temperatures

Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.

Delay timer: can be set to run the programme at a convenient time or to take advantage of offpeak energy periods.

40 cm: Large loading hatch of 40 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

Humidity sensor: allows to adjust dryer to obtain the desired drying level (Iron dry, Cupboard dry and Extra dry), saving time and reducing energy consumption. In addition, manual adjusting allows you to program drying time according to your preferences.

Internal lights: help to illuminate the inside of the drum.

Noise Level: Excellent insulation and special devices keep noise to a minimum.

Delicate: Clothing such as underwear, hosiery and luxury fabrics should be dried on the delicate cycle to help extend the life of the clothing.

Cupboard drying for cotton garments

Drying of cotton garments that need to be ironed

Delicate garments that allows the drying

For synthetic fabrics without pigments and for cotton

Drying cotton garments centrifuged at high speed in just 49 minutes

Gentle drying for shirts in 30 min. avoiding the formation of folds

For synthetic fabrics, ironing is required

To dry wool clohtes placed on a suitable basket

Super fast 49 min: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

Refresh: an ideal program to refresh the garments that have been kept for a long time indoors and eliminate unpleasant odors, without having to wash.

Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.

Shows the phase of program: Shows the phase in which the program is being.
