Symbols glossary

	Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.		Energy efficiency class E
	COMM_HEIGHT_82_72dpi		Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.
	Models with new Flexi Fit hinges are able to be installed in kitchens with a plinth of just 5cms. With this new hinge design, the panel has a sliding movement from the bottom to the top, avoiding any possible interference of the panel with the plinth.		Noise Level: Excellent insulation and special devices keep noise to a minimum.
	Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.		Soak programme: The soak programme provides a rinse to prevent dirt from drying.
	...		...
	Wash cycle for normally soiled mixed loads such as dishes and pans, even with dried-on residues. When this program is selected, the dishwasher recognises the type of dirt and automatically adjusts the washing parameters as appropriate.		Option which improves the washing results of the selected programme. It increases the wash temperature and duration.
	Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.		Programme suitable for washing and drying normally soiled items.
	System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.		The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.
