Symbols glossary

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

This shows the amount of laundry that can be inserted into the tumble dryer in KG.

End: Show the stage at which the program is in progress: the program has finished.

Noise Level: Excellent insulation and special devices keep noise to a minimum.

Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.

For fiber duvets indicating suitability on the label

For synthetic fabrics without pigments and for cotton

Gentle drying for shirts avoiding the formation of folds

Super fast: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

Steam Option: the steam is perfect for smoothing out creases, refreshing fabrics, neutralizing odors and releasing dirt, destroying allergens more quickly than by washing the item in water.

Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.

Delay timer: can be set to run the programme at a convenient time or to take advantage of offpeak energy periods.

40 cm: Large loading hatch of 40 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

Humidity sensor: allows to adjust dryer to obtain the desired drying level (Iron dry, Cupboard dry and Extra dry), saving time and reducing energy consumption. In addition, manual adjusting allows you to program drying time according to your preferences.

Internal lights: help to illuminate the inside of the drum.

Cotton, linen and colored fabrics that do not fade

Program for drying cotton items including sheets, pillow cases, pajamas, lingerie, tablecloths, etc

For high speed centrifuged jeans

Short ventilation for cotton and linen garments without blowing hot air

Selection of timed cycles at low temperatures.

Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.

Shows the phase of program: Shows the phase in which the program is being.

Special program for garments / fabrics, such as children's clothes, which require sanitized and delicate washing.

Program dedicated to drying thick cotton laundry, such as towels, bathrobes, etc.

This programme is suitable for outdoor clothing, waterproof jackets, jackets with inner insulation, etc. Thanks to the delicate temperature and the delicate movement of the drum, it treats the garments better to protect the external fabrics.

Program for delicately treating garments in synthetic or mixed fabrics, such as t-shirts and blouses.

Energy efficiency class E
