Symbols glossary

Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.

Installation in column: Installation in column

COMM_HEIGHT_86_72dpi

Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.

FlexiZone: The ½ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.

Hyclean: When the HYCLEAN option is selected, the dishwasher performs a final 10 minute rinse at a high temperature of 70°C, eliminating virtually all bacteria to achieve the highest possible standards of cleanliness. The Hyclean option can be selected with almost all cycles at temperatures above 50°C.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.

Noise Level: Excellent insulation and special devices keep noise to a minimum.

Delicate: Delicate washing program is designed for delicate dishes which are not heavily soiled.

Delicate: Delicate washing program is designed for delicate dishes which are not heavily soiled.
