## Symbols glossary

Activelight is an led light which projects a red spot onto the floor beneath the dishwasher when the appliance is in use.

Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.

Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.

COMM\_HEIGHT\_86\_72dpi

Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.

Enersave: At the end of the drying cycle a special device slowly automatically opens the door a few centimeters, to ensure perfect drying and to save up to 20% of energy on some models.

FlexiDuo: The FlexiDuo 3rd cutlery basket allows you to arrange cutlery or small cups, ladles, or bulky utensils however you like: it consists of two separate and moveable modules.

Models with new Flexi Fit hinges are able to be installed in kitchens with a plinth of just 5cms. With this new hinge design, the panel has a sliding movement from the bottom to the top, avoiding any possible interference of the panel with the plinth.

FlexiZone: The ½ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.

The new ExtraGlide guide system, available on top of the range models, makes the second basket even smoother and softer. In fact, it facilitates the extraction of the introduction, even at full load and, for the greater excursion, the insertion of crockery is also facilitated in the rear part.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.

PLANETARIUM\_WASHING\_SYSTEM\_72dpi

Delicate: Delicate washing program is designed for delicate dishes which are not heavily soiled.

Delicate: Delicate washing program is designed for delicate dishes which are not heavily soiled.

PRG\_RINSE\_72dpi

Rapid 27 Mins: The rapid 27 mins quick program takes just 27 minutes to wash a load.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.

Clean&Shine option: For perfect cleaning results, this option adds an extra rinse to the wash cycle, which also gives the dishes a higher gloss.

Baking tray programme: for intensive cleaning of the oven trays. Place the trays in the lower basket of the dishwasher.
