Symbols glossary

Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.

Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

COMM_HEIGHT_82_72dpi

Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.

FlexiZone: The ½ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.

The new ExtraGlide guide system, available on top of the range models, makes the second basket even smoother and softer. In fact, it facilitates the extraction of the introduction, even at full load and, for the greater excursion, the insertion of crockery is also facilitated in the rear part

Noise Level: Excellent insulation and special devices keep noise to a minimum.

PLANETARIUM_WASHING_SYSTEM_72dpi

Auto 45°- 65°: The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.

Crystals: The Crystals programme is dedicated to delicate dishes such as glasses and china.

Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.

Normal programme: The normal programme is suitable for normal degrees of dirt for everyday use.

Soak programme: The soak programme provides a rinse to prevent dirt from drying.

Rapid 27 Mins: The rapid 27 mins quick program takes just 27 minutes to wash a load.

Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°c eliminating virtually all bacteria.

The symbols show the number of plate settings of the dishwasher.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

A.

SMEG SPA 2/12/2025

The Dry Assist + option, in addition to saving energy, ensures perfect drying of the dishes by opening the door automatically at the end of the wash c

HYGIENE 99.9% High-temperature washing programme. The 75° rinse guarantees the removal of 99.9% of germs and bacteria, making it ideal for sanitising

The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.
