## Symbols glossary

	Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.		Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.
	COMM_HEIGHT_86_72dpi		Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.
	The Dry Assist + option, in addition to saving energy, ensures perfect drying of the dishes by opening the door automatically at the end of the wash cycle.		Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.
	FlexiDuo: The FlexiDuo 3rd cutlery basket allows you to arrange cutlery or small cups, ladles, or bulky utensils however you like: it consists of two separate and moveable modules.		Flexitabs: Flexitabs adjusts the wash cycle to give the best possible results regardless of the type of detergent used.
	FlexiZone: The 1/2 load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.		The new ExtraGlide guide system, available on top of the range models, makes the second basket even smoother and softer. In fact, it facilitates the extraction of the introduction, even at full load and, for the greater excursion, the insertion of crockery is also facilitated in the rear part.
	Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.		Noise Level: Excellent insulation and special devices keep noise to a minimum.
	PLANETARIUM_WASHING_SYSTEM_72dpi		Auto 45°- 65°: The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.
	Crystals: The Crystals programme is dedicated to delicate dishes such as glasses and china.		Quick wash cycle for normally soiled mixed loads such as dishes and pans, even with dried-on residues. Dishes are washed and dried in 60 minutes.
	The Regular programme is for dishes with regular dirt, even with dried-on residues.		SILENT: Wash cycle suitable for normally soiled dishes, even with dried-on residues. Ensures maximum noise reduction and is therefore ideal if you wish to run it during the night.
	Allows you to enable additional programs when selected together with any wash cycle.		Soak programme: The soak programme provides a rinse to prevent dirt from drying.
	Rapid 27 Mins: The rapid 27 mins quick program takes just 27 minutes to wash a load.		STERYL 75°: Intensive wash cycle ideal for plates, pots, pans, cutting boards, feeding bottles.

Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.

REF\_PRG\_NORMAL\_ECO\_72dpi

The symbols show the number of plate settings of the dishwasher.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.
