|   | 4 stars freezing compartment for better food preservation.   |  |  |
|   | The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.                          |  | Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption. |
|   | Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.               |  | Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.        |
|   | LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.                                    |  | Life Plus 0°C: The temperature in the Lifeplus compartments is kept at 0°C, which preserves fresh meat and fish longer.                    |
|   | Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption. |  | Multiflow Cooling System: the Multiflow ventilation system allows an even distribution of cool air around the fridge cabinet.              |
