|    | 4 stars freezing compartment for better food preservation.                                                                                                                                                                              |  | The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.            |
|    | LED display: to show programmes, functions and options selected and the time to the end of the cycle.                                                                                                                                   |  | Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption. |
|    | Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.                                                                                              |  | Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.        |
|    | Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working.                                                                                                                           |  | LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.                      |
|    | Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption. |  | Air plus: keeps food fresher for longer.                                                                                                   |
