|--|--|---|---|
|  | The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether. |  | Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption. |
|  | Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge. |  | Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage. |
|  | Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working. |  | LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance. |
|  | Life Plus 0°C: The temperature in the Lifeplus compartments is kept at 0°C, which preserves fresh meat and fish longer. |  | Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption. |
|  | Air plus: keeps food fresher for longer. |  | No Frost: The No Frost and Frost free systems prevent ice from forming so that no defrosting is required. |
