## Symbols glossary (TT)

 <p>4 stars freezing compartment for better food preservation.</p>	 <p>Energy efficiency class E</p>
 <p>The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.</p>	 <p>Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.</p>
 <p>LED display: to show programmes, functions and options selected and the time to the end of the cycle.</p>	 <p>Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.</p>
 <p>Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.</p>	 <p>Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.</p>
 <p>Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working.</p>	 <p>LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.</p>
 <p>Life Plus 0°C: The temperature in the Lifepius compartments is kept at 0°C, which preserves fresh meat and fish longer.</p>	 <p>Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.</p>
 <p>Multiflow Cooling System: the Multiflow ventilation system allows an even distribution of cool air around the fridge cabinet.</p>	 <p>Slot-in: The refrigerators with Slot-in opening can be perfectly integrated into the furniture structure, as the doors open at 90° do not go beyond the side of the product. In case of installation next to the wall, it will be necessary to consider the dimensions of the handle in order to open the door at 90°.</p>
