Symbols glossary

Smeg Active lon system improves the quality of the air inside the cell. Thanks to the generation of negatively charged ions released inside the fridge Active lon system neutralizes unpleasant dust.

The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

Antibacterial treatment: antibacterial treatment to ensure better hygiene.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.

Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.

Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

Power saving mode: The power saving mode allows you to disable the refrigerator and keep the freezer working.

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.

Multiflow Cooling System: the Multiflow ventilation system allows an even distribution of cool air around the fridge cabinet.

Natural Plus Blu Light: This unique Natural Plus Blu Light system works with nature to increase the storage time of fruit and vegetables.
