Symbols glossary

Permanent auto pot detection

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Evolution Slider totally Back-lighted ghost effect

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Keep warm function: Keep warm function keeps the cooked food heated. In this mode the heating zone operates at a minimum capacity for 120 minutes and then turns off automatically.

Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

PAUSE_72dpi

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

TWIN_ZONE_72dpi

Min diameter pot detection of 9 cm

Possibility to set the maximum power absorbion of the hob
