## Symbols glossary

	24h: When selected this function refreshes the air for c. 10 minutes every hour over a 24 hour period, at minimum speed and an imperceptible noise level.		A: Product drying performance, measured from A+++ to D / G depending on the product family
	Filters: Model has filters to help remove grease from the steam emanating from the pans during cooking.		Switch off automatically: A special setting, to run after the end of cooking for a pre-set time and then switch off automatically.
	Charcoal filters: Extracting through charcoal filters or directly to the exterior lessens strong cooking odours considerably.		Warning light(s): to advise when filters need changing.
	Lights: All cooker hoods feature lights to illuminate the cooking area or add to the ambience of the kitchen.		Perimeter extraction panels: very efficient and aid noise reduction.
	Intensive/turbo setting: when extra fast extraction is required.		...
