Symbols glossary

			Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.
	Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.		Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		Delay timer: can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.
	LED display: to show programmes, functions and options selected and the time to the end of the cycle.		30 cm: Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.
	This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.		Intensive: this option intensifies the selected program. Cycle duration and water consumption are reduced by taking into account the type of laundry, while still guaranteeing excellent washing results, even in the case of stains that are difficult to eliminate.
	Prewash: program designed for heavily soiled garments.		For lightly soiled fabrics in cotton and linen
	Cotton 40°: For soiled fabrics in cotton		Cotton 60°: For soiled fabrics in cotton
	Cotton 90°: For soiled fabrics in cotton		Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.
	Delicate 30°: Clothing such as underwear, hosiery and luxury fabrics should be dried on the delicate cycle to help extend the life of the clothing.		To drain the water in the machine.
	Extra Rinse: Extra Rinse: adds an extra rinse cycle to that already provided in the program chosen, to remove any residual detergent. This function is particularly suitable for those with allergies or skin problems.		Mix 30°: washing program that allows to to wash your cotton and synthetic clothes together without sorting them.

	Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.		Super fast 15 min: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.
	Super fast 30°: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.		To drain the water into the basket + centrifuge action
	Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.		Synthetic 30 °: washing program at 30 ° for Synthetics items
	Synthetic 40 °: washing program at 30 ° for Synthetics items		Synthetics: Synthetics washing program is designed for non-cotton items that need a slightly more delicate wash
	Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.		Wool Cold: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.
	Option that allow to reduce times of the selected program.		Drum has maximum capacity of 7kg of dry laundry.
	Energy efficiency class E
