smeg

LBI127

EAN Code	8017709302801
Product Family	Washing Machine
Commercial width	60 cm
Installation	Fully integrated built-in
Load type	Frontal

Programs

Controls	Electronic
Programmes graphics	Symbols
No. of programmes	15
Programmes	

Shirts	Cotton	Delicates
Eco 40-60	Jeans	Wool
Hand Wash	Mix	Night
Duvet	Quick Wash	Rinse + Spin
Drain + Spin	Synthetics	Sport

Washing Temperature

Cool	20°C	30°C
40°C	60°C	90°C

Special programmes

Shirts	Jeans	Night
Quick 15 min	Sport	

Display

Residual time indicator	delay start	programme status indication
spin regulation	temperature regulation	

Display type

 LED DISPLAY

Buttons/Options

Delay timer	Prewash	Additional rinse
Anti-wrinkle (easy ironing)	Quick	Intensive

Programme progress indicator (light) On display
End of cycle indicator (light) On display

Technical Features

Type of motor	Standard		**Door opening**	110°
Electronic control functioning	Yes		**Automatic variable load**	Yes
			Antifoam system	Yes
Programme/temperature selection knob	Yes		**Load balancing system**	Automatic
Spin speed selection on display/LED	No spin/ 500/ 600/ 800/ 1000/ 1200		**Easy to access filter**	Yes
			Child lock (functions block)	Control block
Polypropilene tank	Yes		**Anti-flood system**	Yes
Basket	Stainless steel		**Aquastop system**	Total
Drum capacity	52 l		**Furniture door can be fitted on right or left side with adjustable hinges**	Yes
Liquid detergent accessory as standard	Yes			
Door diameter	30 cm			

Performance / Energy Label - Reg. 2019

Supplier's name or trademark	SMEG		**Spin-drying efficiency class**	C
Rated Capacity	7 kg		**Airbone acoustical noise class**	A
Energy Efficiency Class	E		**Airbone acoustical noise**	70 dB(A) re 1 pW
Energy_cons_100	77 KWh		**Programme duration at rated capacity**	2:50 h:min
Water Consumption	44 litres			

Electrical Connection

Plug	(F;E) Schuko		**Voltage (V)**	220-240 V
Nominal power	2200 W		**Frequency (Hz)**	50 Hz
Current	10 A			

Power supply cable length	225 cm

KITPLV2

Kit extension for dishwasher and washing machine: lenght mt. 2

KITWDHE1

Symbols glossary

Total acquastop: Most models of Smeg dishwashers are equipped with Acquastop Totale, which allows to avoid flooding as a result of water leakage. The system consists of a a float sensor, disposed under the inner chamber of a dishwasher, which blocks water supply inside the appliance in case of water leakage into the lower tray. An additional electromagnetic valve on the water inlet hose also automatically blocks water supply if detecting water leakage in the hose. For Laundry: Total acquastop, the product is built with 3 levels of anti-flood devices to ensure protection against water leakage. For Laundry: Total acquastop, the product is built with 3 levels of anti-flood devices to ensure protection against water leakage.

Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.

Delay timer: can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.

30 cm: Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

Intensive: this option intensifies the selected program. Cycle duration and water consumption are reduced by taking into account the type of laundry, while still guaranteeing excellent washing results, even in the case of stains that are difficult to eliminate.

Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.

Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.

Prewash: program designed for heavily soiled garments.

Cotton: For soiled fabrics in cotton

Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.

Delicate: Clothing such as underwear, hosiery and luxury fabrics should be dried on the delicate cycle to help extend the life of the clothing.

To drain the water in the machine.

Extra Rinse: Extra Rinse: adds an extra rinse cycle to that already provided in the program chosen, to remove any residual detergent. This function is particularly suitable for those with allergies or skin problems.

Hand wash: this specific programme for delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.

Jeans: a washing cycle which is kind to the colour and fabric of denim whilst minimising wrinkles.

Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.

Night: an ideal programme for those who want to take advantage of off-peak energy periods, this cycle is particularly quiet due to slower rotations of the drum.

Super fast 15 min: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

Super fast: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

To drain the water into the basket + centrifuge action

Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.

Gym: Gym, a cycle designed for washing lightly soiled garments, ie sports wear, this is a fast wash which is also kind to fabrics.

Synthetics: to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). It washes with a gentle action and has a shorter washing cycle compared to the Cottons programme. For curtains and tulle, use the Synthetic 40°C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.

Option that allow to reduce times of the selected program.

Drum has maximum capacity of 7kg of dry laundry.

Energy efficiency class E
