## Compatible Accessories

---

### **KITPLV2**

Kit extension for dishwasher and washing machine: lenght mt. 2

### **KITWDHE1**

5 cm raising kit for built-in washing machines and washer dryers

## Symbols glossary

|   |  |
|---|--|
|  <p>A++: Energy efficiency class A++ helps to save up to 20% energy compared to class A. Maximum performance with minimum consumption is guaranteed.</p>  |  <p>Total acquastop: Most models of Smeg dishwashers are equipped with Acquastop Totale, which allows to avoid flooding as a result of water leakage. The system consists of a float sensor, disposed under the inner chamber of a dishwasher, which blocks water supply inside the appliance in case of water leakage into the lower tray. An additional electromagnetic valve on the water inlet hose also automatically blocks water supply if detecting water leakage in the hose. For Laundry: Total acquastop, the product is built with 3 levels of anti-flood devices to ensure protection against water leakage.</p> |
|  <p>Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.</p>   |  <p>Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.</p>   |
|  <p>Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.</p>  |  <p>Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.</p>  |
|  <p>Delay timer: can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.</p>  |  <p>LED display: to show programmes, functions and options selected and the time to the end of the cycle.</p>   |
|  <p>30 cm: Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.</p>  |  <p>This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.</p>   |
|  <p>FlexiTime: The FlexiTime option allows the user to reduce the time of the cycle selected, providing extra flexibility and control.</p>  |  <p>Intensive option: this function extends the duration of the wash cycle and increases the intensity of the wash, ensuring a deeper cleaning for heavily soiled garments.</p>   |
|  <p>Prewash: program designed for heavily soiled garments.</p>  |  <p>Cotton: programme designed for washing medium to heavily soiled cotton garments, ensuring thorough and effective cleaning.</p>  |
|  <p>Eco 40-60: reference programme defined by EU regulations for measuring the energy performance of washing machines. Ideal for normally soiled cotton garments washable at 40 °C or 60 °C, it provides an excellent balance between cleaning performance and savings, although it requires a longer washing time.</p> |  <p>Delicate: Clothing such as underwear, hosiery and luxury fabrics should be dried on the delicate cycle to help extend the life of the clothing.</p>   |

|  |  |   |   |
|--|--|---|---|
|    | To drain the water in the machine.   |    | Extra Rinse: Extra Rinse: adds an extra rinse cycle to that already provided in the program chosen, to remove any residual detergent. This function is particularly suitable for those with allergies or skin problems.   |
|    | Hand wash: this specific programme for delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.                              |    | Jeans: a washing cycle which is kind to the colour and fabric of denim whilst minimising wrinkles.  |
|    | Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.              |    | Night: an ideal programme for those who want to take advantage of off-peak energy periods, this cycle is particularly quiet due to slower rotations of the drum.  |
|    | Quick 15 min.: ideal for small loads of lightly soiled garments, it guarantees a fast wash in a very short time.   |    | Super fast: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.  |
|    | Rinse and Spin: this programme is suitable for rinsing and spinning garments.  |    | Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.  |
|   | Sport: programme designed to quickly wash sports and technical clothing, which undergo frequent washes, ensuring optimal hygiene and protection of the fibres. |   | Synthetics: programme designed for synthetic and mixed-fibre fabrics. Ideal for lightly to normally soiled garments, it uses moderate temperatures and a gentler washing action to protect the fibres and reduce creasing, ensuring effective cleaning without stressing the materials. |
|  | Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.                                    |  | Option that allow to reduce times of the selected program.  |
|  | Drum has maximum capacity of 7kg of dry laundry.   |  | Energy efficiency class E   |
