Symbols glossary

 To improve the drying of dishes without leaving stains.	 Energy efficiency class D
 Delay Timer: Option to postpone the start of the desired programme by up to 24 hours in order to programme the dishwasher to run at the desired time.	 The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.
 Noise Level: Excellent insulation and special devices keep noise to a minimum.	 EXTRA DRY This option adds a hot rinse cycle that ensures improved drying.
 Orbital wash system distributes water evenly throughout the 60cm dishwasher cavity, directing water with precision to ensure an excellent wash.	 1/2 load: This program is designed for washing dishes not heavily soiled with partial load of the dishwasher.
 Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.	 Mix: The Mix programme is suitable for mixed crockery and everyday pots and pans, without any particular incrustation.
 Soak programme: The soak programme provides a rinse to prevent dirt from drying.	 Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.
 13 place settings: Number of place settings.	 Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.
 System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.
