**Colour:** Chrome

## Symbols glossary

ESC: with the ESC Energy Saving Cartridge system the control lever positioned in the middle dispenses only cold water, and not 50% of hot and 50% of cold. To obtain hot water, turn the lever further to the left. Thus the use does not operate the boiler.

WSC: with the WSC Water Saving Cartridge the control lever stops halfway, causing 50% of the water (sufficient for normal cooking activities) to be dispensed from the mixer to save water consumption.

Swivel spout rotation 180°

The extractable handshower allows to increase the range of action of the tap and it is extremely versatile, practical and comfortable.
