Safety Thermostat

Yes

Cooling system

Tangential

Microwave screen protection

Yes

Microwave stops when door is opened

Yes

Inverter

Yes

Circulaire heating element - Power	2500 W	Usable cavity space dimensions (HxWxD)	249x351x361 mm
		Microwave effective power	1100 W

Accessories included

Grid	1
-------------	---

Electrical Connection

Plug	(G) UK e Singapore	Voltage (V)	230 V
Nominal power	1800 W	Frequency (Hz)	50 Hz
Current	7,83 A	Power supply cable length	100 cm

Symbols glossary

	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		Combination microwave: This oven allows to combine two different ways of cooking (Traditional with microwaves). Combined ovens increase cooking opportunities, while providing maximum flexibility of household appliances.
	Microwave energy shortens cooking times dramatically and produces energy savings.		Defrost by time: Manual defrost function. At the end of the set duration, the function stops.
	Defrost by weight: Automatic defrost function. You choose the type of food to defrost from the available categories (MEAT - FISH - BREAD - DESSERTS) After entering the weight of the food, the oven automatically defines the time required for proper defrosting.		Double glazed doors: Number of glazed doors.
	Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.		Circulaire + grill: Circulaire with upper element or grill: Similar to fan with upper element with the added cooking speed of circulaire, ideal for dishes with a crispy topping. When used with the grill the food will brown more quickly.
	Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly. The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.		Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.
	Fan grill: very intense heat coming only from above from a double heating element. The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.		Microwave: Penetrating straight into the food, microwaves cook very quickly and with considerable energy savings. Suitable for cooking without fat, they are also able to thaw and heat food without altering its original appearance and aroma. The microwave function can also be combined with conventional functions with all the resulting advantages. Ideal for all types of food.
	Cooking with the simultaneous use of the heating element in combination with fan and microwave supply.		Microwave + grill element: The use of the grill results in a perfect browning of the surface of the food. The action of microwaves allows instead of cooking in a short time the internal part of the food.
	Pizza microwave: This function cooks pizza quicker thanks to the microwaves. To optimize the final result, use the function combined with the Chef plate.		Side lights: Two opposing side lights increase visibility inside the oven.
	The capacity indicates the amount of usable space in the oven cavity in litres.		

Benefit (TT)

Electronic control

Timely temperature management and heat uniformity

Automatic programmes

Preset programmes to simplify use and improve efficiency

Child control lock

Thanks to the child safety lock, the microwave provides peace of mind for parents while improving overall safety in the home environment

Pizza function

Preset mode for optimal baking or heating of pizza

Inverter Technology

Smoother, faster and gentler cooking thanks to new microwave technology - Inverter Technology

Thanks to continuous and precise power management, microwaves with Inverter distribute heat evenly, allowing food to be defrosted and cooked more efficiently, reducing preparation time and improving results.
