The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

Energy efficiency class G

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

## Benefit (TT)

---

The R600a refrigerant, with a low environmental impact, ensures rapid cooling and reduced energy consumption.

The integrated handle optimises space and reduces the risk of bumps thanks to the absence of protrusions. Additionally, the continuous surface makes cleaning easier.

The internal lighting ensures optimal visibility of the shelves, improving organisation within the fridge compartment.

Automatic defrosting prevents ice build-up and reduces the need for manual intervention, improving reliability and service continuity.
