

PGF32I-1

Product Family

Built-in type	Hob
Dimensions	Ultra-low profile
Power supply	30 cm
Type	Electric
EAN code	Induction
	8017709161941

Aesthetics

Aesthetic

Colour	Classica
Finishing	Stainless steel/Black
Material	Satin
Type of steel	Stainless Steel
Frame	Brushed
Frame colour	Yes
Type of control setting	Stainless Steel
Control knob position	Control knobs
No. of controls	Front
Controls colour	2
Logo	Steel effect
Serigraphy colour	Silk screen
	Black

Program / Functions

No. of induction cook zones	2
Total no. of cook zones	2

Options

Worktop Cut-Out	494x292 mm	Control Lock / Child Safety	Yes
-----------------	------------	-----------------------------	-----

Technical Features

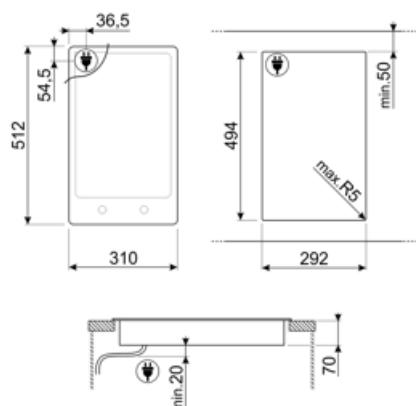

Front-centre - Induction - Single - 1.40 kW - Booster 2.20 kW - Ø 14.5 cm

Rear-centre - Induction - Single - 1.80 kW - Booster 3.00 kW - Ø 21.0 cm

Automatic setting according to pan dimension	Yes	Automatic switch off when overheated	Yes
pan detection	Yes	Residual heat indicator	Yes
Minimum pan diameter indication	Yes	Protection against accidental start up	Yes

Electrical Connection

Electrical connection rating (W)	3500 W	Frequency (Hz)	50/60 Hz
Current	16 A	Power supply cable length	120 cm
Voltage (V)	220-240 V	Plug	Not present
Type of electric cable installed	Yes, Single phase		

Compatible Accessories

6MP1PGF

6 Linea knobs for PGF hobs

LGPGF-1

Aluminium connecting strip for PGF

SCRP

Non-scratch hob scraper - suitable for induction and ceramic hobs

Symbols glossary

Ultra-low profile: Installation of product with flat edge - height of 1 mm.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.
