|--|---|---|--|
|  | Ultra-low profile: Installation of product with flat edge - height of 1 mm. |  | Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed. |
|  | Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit. |  | Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob. |
|  | Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out. |  | Knobs control |
