## Symbols glossary

---

Ultra-low profile: Installation of product with flat edge - height of 1 mm.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.
