

PGF32I-1

Product Family	Hob
Built-in type	Ultra-low profile
Dimensions	30 cm
Power supply	Electric
Type	Induction
EAN code	8017709161941

Aesthetics

Aesthetic	Classica
Colour	Stainless steel/Black
Finishing	Satin
Material	Stainless Steel
Type of steel	Brushed
Frame	Yes
Frame colour	Stainless Steel
Type of control setting	Control knobs
Control knob position	Front
No. of controls	2
Controls colour	Steel effect
Logo	Silk screen
Serigraphy colour	Black

Program / Functions

No. of induction cook zones	2
Total no. of cook zones	2

Options

Worktop Cut-Out	494x292 mm	Control Lock / Child Safety	Yes
------------------------	------------	------------------------------------	-----

Technical Features

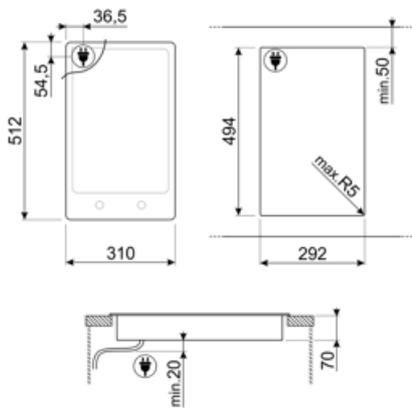

Front-centre - Induction - Single - 1.40 kW - Booster 2.20 kW - Ø 14.5 cm

Rear-centre - Induction - Single - 1.80 kW - Booster 3.00 kW - Ø 21.0 cm

Automatic setting according to pan dimension	Yes	Automatic switch off when overheat	Yes
pan detection	Yes	Residual heat indicator	Yes
Minimum pan diameter indication	Yes	Protection against accidental start up	Yes

Electrical Connection

Electrical connection rating (W)	3500 W	Frequency (Hz)	50/60 Hz
Current	16 A	Power supply cable length	120 cm
Voltage (V)	220-240 V	Plug	Not present
Type of electric cable installed	Yes, Single phase		

Compatible Accessories

6MP1PGF

6 Linea knobs for PGF hobs

SCRP

Non-scratch hob scraper - suitable for induction and ceramic hobs

LGPGF-1

Aluminium connecting strip for PGF

Symbols glossary

Ultra-low profile: Installation of product with flat edge - height of 1 mm.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.
