|                                                                                    |                                                                                                                                                                                                                                                 |                                                                                     |                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | Permanent auto pot detection                                                                                                                                                                                                                    |    | Powerbooster: optie zorgt ervoor dat de zone op vol vermogen werkt wanneer zeer intensief koken nodig is.                                                                                                                    |
|    | Ultra-low profile: Installation of product with flat edge - height of 1 mm.                                                                                                                                                                     |    | Heavy duty gietijzeren pannendragers: voor maximale stabiliteit en sterkte.                                                                                                                                                  |
|    | Kinderslot: sommige modellen zijn voorzien van een apparaat om het programma / de cyclus te vergrendelen zodat het niet kan per ongeluk veranderd                                                                                               |    | The slider control panel allows you to adjust the power simply by passing your finger across the touch device.                                                                                                               |
|    | Versterkte basis: Een versterkte basis, exclusief ontwikkeld door Smeg, bestaat uit een stalen laag bevestigd aan de onderkant van het glasoppervlak van al het gas op glazen kookplaten.                                                       |    | This function allows you to keep cooked food warm without burner it                                                                                                                                                          |
|    | Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.                                                                                                                         |    | Melting function, suitable for slowly melting delicate foods such as chocolate or butter.                                                                                                                                    |
|  | Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility                                                                                                                        |  | Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.                                                                                                            |
|  | All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated. |  | Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth). |
|  | Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.                       |  | Simmering function: ideal for long-cooking recipes, preventing food from boiling over or sticking to the pan.                                                                                                                |
|  | Time elapsed: shows how long the cooking zone has been in use.                                                                                                                                                                                  |  | Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.                                                                                                                                   |
|  | Ultrasnelle branders: Krachtige ultrasnelle branders bieden tot 5kw vermogen.                                                                                                                                                                   |  | Darkness becomes light                                                                                                                                                                                                       |
|  | Knobs control                                                                                                                                                                                                                                   |                                                                                     |                                                                                                                                                                                                                              |

---

## Benefit (TT)

---

### **Mixed type hob**

Maximum efficiency and precision in one system: induction for speed and savings, gas for flame control

### **Glass**

Brightness and elegance in the kitchen: the acid-etched glass gives the surface a refined, modern look that enhances the space.

### **Eclipse**

Minimal design and high performance meet in Eclipse black glass, with no visible screen printing

### **Cast iron**

Solid and sturdy, easy to clean and maintain every day, thanks to the cast-iron pan supports—an emblem of long-lasting efficiency and durability.

### **Smeg Contemporanea**

Optimal cooking with every dish: burners combine high performance, efficiency, and practicality, ensuring precise, even results even with intensive use.

Accurate power adjustment via knobs, for more precise cooking level control

### **Control knob position frontal**

Instant and intuitive control thanks to front controls, easily accessible for practical use.

Fits even the smallest spaces: Monozona modules let you customize the cooktop according to your needs, optimizing space in compact kitchens.

### **Keep Warm function**

Dishes always served at the right temperature, even after cooking, thanks to the Keep Warm function

Nine power levels and Boost function for optimal cooking performance

### **Gas safety valves**

Automatic protection against gas leaks: the thermocouple stops gas flow in the absence of flame, ensuring a safe environment even during unexpected shutdowns.

### **Melting/Low temperature cooking function**

Delicate ingredients like butter or chocolate can be melted at 44°C in a controlled way

---

### **Glass on steel**

Safety even in case of breakage: a stainless steel sheet beneath the glass prevents fragmentation, allowing continued use until replacement.

### **MultiZone**

Large surface created by joining two contiguous zones, perfect for large dishes

In addition to their sleek aesthetics and contemporary design, Smeg induction hobs are equipped with innovative technologies. The Multizone function guarantees maximum flexibility in the use of the hob and endless cooking possibilities, expanding the cooking area to suit the shape and size of different pans

### **Permanent Automatic Pot Detection with indication of the relative control**

Automatic activation of the correct cooking zone with Autopot Detection, recognizing the pot without user intervention
