## Benefit (TT)

---

### **Gas hobs**

Consistent heat source control and easy, immediate temperature adjustment

Equipped with a thermocouple, the gas supply is cut off if the flame is extinguished for greater safety.

### **Glass**

Brightness and elegance in the kitchen: the acid-etched glass gives the surface a refined, modern look that enhances the space.

### **Ceramic**

Stability and design even up to 700°C: the cooktop material resists high temperatures without deforming, maintaining aesthetics and functionality even with intensive use.

### **Stainless steel**

Strong and easy to maintain every day: doesn't break if dropped, resists rust, easy to clean with detergents, and doesn't absorb liquids or odors.

### **Laminate**

Top energy efficiency: thanks to Smeg's exclusive patent, heat is transferred directly to the pot, improving energy use and cooking performance.

Accurate power adjustment via knobs, for more precise cooking level control

### **Control knob position frontal**

Instant and intuitive control thanks to front controls, easily accessible for practical use.

6 powerful burners for maximum freedom: deliver top performance and total freedom in the kitchen, ideal for complex recipes and those who need space and power.

### **Gas safety valves**

Automatic protection against gas leaks: the thermocouple stops gas flow in the absence of flame, ensuring a safe environment even during unexpected shutdowns.

### **Glass on steel**

Safety even in case of breakage: a stainless steel sheet beneath the glass prevents fragmentation, allowing continued use until replacement.
