

SAWD844

EAN Code	8017709338404
Product Family	Washer dryer
Commercial width	60 cm
Commercial depth	Standard capacity
Installation	Free-standing
Load type	Frontal

Programs

Controls		Electronic

Technical Features

Type of motor Brushless/Inverter
Electronic control Yes
functioning
Programme selection Yes
knob
Spin speed selection on No spin/ 600/ 800/ 1200/
display/LED 1400
Display/led for Yes
temperature regulation
Basket Stainless steel
Drum capacity 55 l
Door diameter 33 cm

Door opening 160°
Automatic variable load Yes
Antifoam system Yes
Load balancing system Automatic
Easy to access filter Yes
Child lock (functions Control block
block)
Anti-flood system Yes
Water supply Single, cold

Performance / Energy Label

Max spin speed 1400 giri/min

complete cycle

Weighted energy 32 KWh
consumption lavaggio
Water consumption 69 litre
(washing cycle)
Airbone acoustical noise 76 dB(A) re 1 pW

Symbols glossary

	Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.		Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		LED display: to show programmes, functions and options selected and the time to the end of the cycle.
	33 cm: Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.		Gentle drying: program designed to get laundry ready for easy ironing.
	This shows the amount of laundry that can be inserted into the tumble dryer in KG.		This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.
	Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.		Prewash: program designed for heavily soiled garments.
	Cotton: For soiled fabrics in cotton		Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.
	To drain the water in the machine.		To drain the water into the basket + centrifuge action

Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.

Synthetics: to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). It washes with a gentle action and has a shorter washing cycle compared to the Cottons programme. For curtains and tulle, use the Synthetic 40°C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

Steam Option: the steam is perfect for smoothing out creases, refreshing fabrics, neutralizing odors and releasing dirt, destroying allergens more quickly than by washing the item in water.

Benefit (TT)

Up to 15 programmes

Up to 15 programmes to meet every daily need

LED Display

With soft touch control and LED lights for intuitive and fast setting and selection of each option

Steam Energy Technology

Perfect removal of stains, smells, creases and allergens using steam

Steam Energy technology, uses steam, at the beginning or end of the cycle depending on the programme, to remove stains, creases, smells and allergens.

Inverter

Greater energy efficiency, lower consumption, and longer lifespan by reducing wear and noise thanks to the Inverter motor

Giant door

Increased convenience and versatility, making loading and unloading laundry easier thanks to the new giant door opening
