

SBC4104G

Product Family	Blast chiller
Category	45cm compact
Vitality system	Yes
Power supply	Electric
Heat source	Electric
Cooling type	Fan assisted

Aesthetics

Aesthetics	Linea	Glass Type	Clear1
Colour	Neptune Grey	Serigraphy colour	Black
Finishing	Matte	Door	Full glass
Design	Flat	Handle	Linea minimal
Material	Glass	Handle Colour	Satin metal and black
Alternative colours available	Stainless steel, Pure Black, Neptune Grey, Nero Lucido	Logo	Silk screen

Program / Functions

Automatic programmes	8
No. of warming functions	6
N. cold functions	5
Automatic cleaning	
Customisable recipes	100
Cold functions	

Bottles Cooling	Cooling	Deep Freezing
Pre-cooling	Preservation	
Warming functions		
Low Temperature Cooking	Proving	Ready to eat
Defrosting	Heating	Yoghurt

Multi-step

Yes, up to 2 functions

Controls

Display / Clock

TFT graphic , colour touch screen

Control setting

Touch control

Options

Door open alarm Yes

Minute minder Yes

Timer 2

Controls Lock / Child Safety Yes

Cooking with probe thermometer Yes

Cooling with probe Yes

Showroom demo option Yes

Tones Polyphonic

History Yes, the last 10 functions utilised

Touch guide Yes, with a long press on the display

Technical Features

Type of compressor Standard

Refrigerant gas type R290

Refrigerant Quantity 58 g

Climatic class SN, N, ST, T

Temperature control Electronic

Minimum Temperature -28 °C

Maximum temperature 75 °C

Cavity material Stainless steel

Shelf positions 3

Shelves type Metal racks

No. of lights 1

Light type Halogen

Light power 1 W

Light when door is opened Yes

Upper heating element - 250 W

Power

Door opening type Standard opening

Safety Thermostat Yes

Heating suspended Yes

when door is opened

Gross volume 34 l

Accessories Included

Grid with back stop 1

Bottle rack grid Yes

Temperature probe Yes

Other Microfiber cloth

Electrical Connection

Voltage 220-240 V

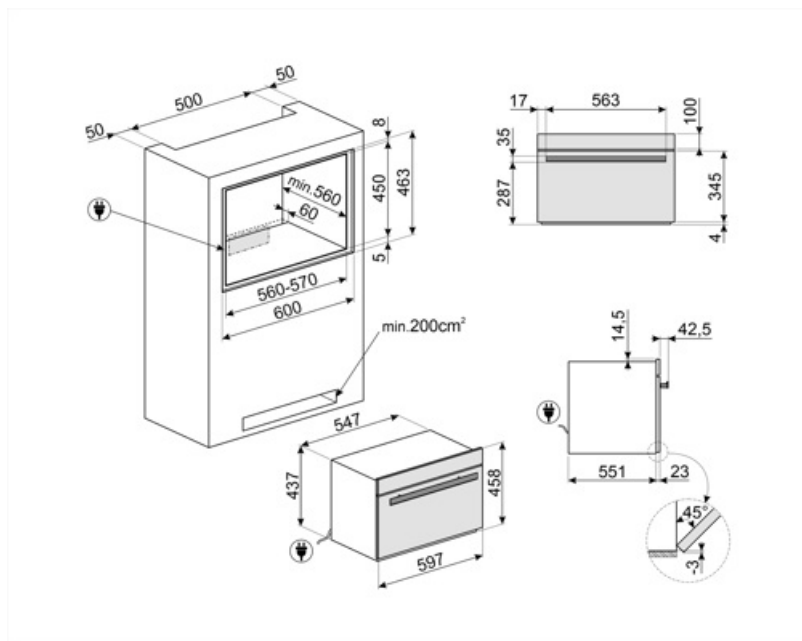

Plug (F;E) Schuko

Nominal power (W) 270 W

Current 2,5 A

Frequency (Hz) 50 Hz

Power supply cable length 200 cm

Alternative products

SBC4104B3

Colour: Black

Symbols glossary

	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		Cooling: It allows to quickly cool the food, from the temperature of 80/90°C to 3°C in less than 90 minutes, to prevent bacterial growth, prolong the average life of food and maintain unaltered the quality of food.
	Cold storage: allows to keep the food at the desired temperature between -35°C and +75°C and serve it at its best to enhance flavours and aromas.		Pre-cooling: allows the cavity to cool to -30 °C before inserting food into the blast chiller, to ensure the best cooling and freezing results. It is recommended to run a 15-minute pre-cooling cycle.
	Bottles cooling: is possible to quickly cool wine and beverage bottles, reducing the need for storage in the refrigerator, with considerable space savings. Cooling of beverages takes place at about 1°C per minute.		Deep freezing of the food is a very quick process (From 0/90°C temperature to -18°C in less than 270 min) that allows to extend the average life of food (by up to 70% more) and keep the same organoleptic and nutritional characteristics of fresh food, because it avoid the formation of macro-crystals, that ruin the fibers of the food.
	Electric		Automatic cleaning: a drying cycle of the cavity to be run with the door open, to eliminate any condensation formed during use.
	Compact appliances with a height of 45 cm - perfect solution to meet the functional requirements of kitchen sets of small height. Available in several types and in different styles.		Touch controls: Easy to use touch controls allow the appliance to be programmed at the touch of a button.
	The capacity indicates the amount of usable space in the oven cavity in litres.		Ready to eat: This function allows to keep food safely at the refrigerator temperature throughout the day, and heat it just before your return to make it warm, ready to be consumed.
	Low temperature cooking: This function consists in cooking food at a constant temperature, lower than the traditional cooking temperature. Meat results more tender and juicy, maintaining a softness that only this cooking technique allows to obtain.		Dough leavening/ Yogurt: this function allows you to create the perfect conditions for correct leavening, keeping the mixture at controlled temperatures for the desired time, avoiding sudden changes in humidity levels. This feature also allows the creation of genuine homemade yogurt.
