Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Standard installation: Traditional installation in tabletop, suitable for any kitchen sets

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Touch control

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Glass ceramic: The base of the hob is made glass ceramic. Heating is performed by the heating elements Hi-Light.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Benefit (TT)

Ceramic hobs

Shorter cooking times and constant temperature control thanks to the ceramic cooktop, ensuring high performance

Glass

Brightness and elegance in the kitchen: the acid-etched glass gives the surface a refined, modern look that enhances the space.

Ceramic

Stability and design even up to 700°C: the cooktop material resists high temperatures without deforming, maintaining aesthetics and functionality even with intensive use.

Immediate access to functions via touch display, for simple and intuitive control

Control knob position frontal

Instant and intuitive control thanks to front controls, easily accessible for practical use.

Nine power levels and Boost function for optimal cooking performance
