## Elektrische aansluiting

|          |           |            |       |
|----------|-----------|------------|-------|
| Spanning | 220-240 V | Frequentie | 50 Hz |
| Stroom   | 14 A      |            |       |

Nominale  
aansluitwaarde

3100 W

Lengte voedingskabel 115 cm

## Not included accessories

### PR3845N

Black cover for furniture when more ovens are installed in column

### PR3845X

Inox profiel voor installatie ovens in kolom

### PALPZ

Pizzapallet inox met plooibaar handvat, 315x325 mm

### BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

### GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### BN620-1

Enamelled tray suitable for 45cm and 60cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

### GTT

Volledig uitschuifbare telescopische rails (1 niveau) voor traditionele ovens (SF-).

|    | Sommige modellen zijn voorzien van een functie om het programma/de cyclus te blokkeren zodat het niet per ongeluk kan aangepast worden.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    | Combination microwave: This oven allows to combine two different ways of cooking (Traditional with microwaves). Combined ovens increase cooking opportunities, while providing maximum flexibility of household appliances.                                                                                                                                                           |
|    | Air cooling system: to ensure a safe surface temperatures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |    | Defrost by time: Manual defrost function. At the end of the set duration, the function stops.                                                                                                                                                                                                                                                                                         |
|    | Defrost by weight: Automatic defrost function. You choose the type of food to defrost from the available categories (MEAT - FISH - BREAD - DESSERTS) After entering the weight of the food, the oven automatically defines the time required for proper defrosting.                                                                                                                                                                                                                                                                                                                                                                                                                |    | Breed touch display                                                                                                                                                                                                                                                                                                                                                                   |
|    | Triple glazed doors: Number of glazed doors.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |    | EASYGUIDE_72dpi                                                                                                                                                                                                                                                                                                                                                                       |
|    | Automatic lighting deactivation: For greater energy savings, the lighting turns off automatically after one minute from the start of cooking The option can be disabled via the settings menu. In this case the light will remain on for the entire duration of cooking.                                                                                                                                                                                                                                                                                                                                                                                                           |    | Elektrische aansluiting                                                                                                                                                                                                                                                                                                                                                               |
|  | Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking |  | Ventilator met bovenste en onderste elementen: De elementen in combinatie met de ventilator zijn bedoeld om een meer gelijkmatige warmte te bieden, een methode die vergelijkbaar is met conventioneel koken, dus voorverwarmen is vereist. Het meest geschikt voor items die langzaam koken vereisen.                                                                                |
|  | Alleen boven- en onder element: een traditionele kookmethode die het meest geschikt is voor losse items in het midden van de oven. de bovenkant van de oven zal altijd het heetst zijn. Ideaal voor gebraden vlees, fruitcake, brood etc.                                                                                                                                                                                                                                                                                                                                                                                                                                          |  | Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.                                                                                                                                      |
|  | Circulaire met onderste element: De toevoeging van het onderste element voegt extra warmte toe aan de basis voor voedsel dat extra moet worden gekookt.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  | Circulaire: De combinatie van de ventilator en het ronde element eromheen zorgt voor een hete lucht kookmethode. Dit biedt vele voordelen, waaronder geen voorverwarmen als de kooktijd meer dan 20 minuten bedraagt, geen smaakoverdracht bij het gelijktijdig bereiden van verschillende soorten voedsel, minder energie en kortere kooktijden. Geschikt voor alle soorten voedsel. |

|                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  <p>De combinatie van de grill, de ventilator en onderwarmte is interessant voor het bereiden van kleine hoeveelheden.</p>                                                                                                  |  <p>Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.</p>                                                                                                                                                                                                    |
|  <p>Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.</p>                                |  <p>Microwave: Penetrating straight into the food, microwaves cook very quickly and with considerable energy savings. Suitable for cooking without fat, they are also able to thaw and heat food without altering its original appearance and aroma. The microwave function can also be combined with conventional functions with all the resulting advantages. Ideal for all types of food.</p>                                         |
|  <p>Cooking with the simultaneous use of the heating element in combination with fan and microwave supply.</p>                                                                                                              |  <p>Microwave + grill element: The use of the grill results in a perfect browning of the surface of the food. The action of microwaves allows instead of cooking in a short time the internal part of the food.</p>                                                                                                                                                                                                                      |
|  <p>Fan combined with traditional cooking, where heat is generated from above and below, provides uniform heat. Adding the microwave function allows the same cooking results in less time.</p>                             |  <p>This function can reheat precooked dishes, without becoming dry or hard.</p>                                                                                                                                                                                                                                                                                                                                                         |
|  <p>Pizza function: Specific function for cooking pizza in a pan. It allows to obtain a pizza that is soft inside and crispy outside with the topping perfectly cooked, not dry and not burnt.</p>                        |  <p>Circulaire met bovenste en onderste elementen: door het gebruik van de ventilator met beide elementen kan voedsel snel en effectief worden gekookt, ideaal voor grote stukken vlees die grondig moeten worden gekookt. Het biedt een vergelijkbaar resultaat als rotisserie, waarbij de warmte rond het voedsel wordt verplaatst in plaats van het voedsel zelf te verplaatsen, waardoor elke maat of vorm kan worden gekookt.</p> |
|  <p>Compacte toestellen met een hoogte van 45 cm - perfecte oplossing om te voldoen aan de functionele eisen van keukensets met een kleine hoogte. Verkrijgbaar in verschillende soorten en in verschillende stijlen.</p> |  <p>Met deze functie kan u bereidingen warmhouden zodat het eten niet meteen afkoelt</p>                                                                                                                                                                                                                                                                                                                                               |
|  <p>Side lights: Two opposing side lights increase visibility inside the oven.</p>                                                                                                                                        |  <p>Plate rack warming: function for heating or keeping dishes warm. Place the baking tray on the lowest shelf and stack the dishes to be heated.</p>                                                                                                                                                                                                                                                                                  |
|  <p>Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted</p>                                                            |  <p>Rapid preheating: cooking is preceded by the preheating phase which allows the cooking compartment to reach the set temperature. This option reduces the time by up to 50%.</p>                                                                                                                                                                                                                                                    |
|  <p>SABBATH: function that allows to cook food respecting Judaism's day of rest provisions.</p>                                                                                                                           |  <p>Option designed to solve any doubts More than 100 pop-ups, which can be triggered with a long touch on any icon, provide information on the use of the display and cooking.</p>                                                                                                                                                                                                                                                    |

- |                                                                                    |                                                                                                                                                                                                                     |                                                                                   |                                                                                                                                                                                                                                         |
|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | The oven cavity has 3 different cooking levels.                                                                                                                                                                     |  | Smart Cooking is the perfect recipe for every occasion. Meat, fish, pasta, desserts, etc . up to 150 automatic recipes that allow to make any preparation in a single click. Decide your menu and then the oven takes care of the rest. |
|    | Alle modellen zijn voorzien van een soft close deursysteem waarbij de deur zacht en stil sluit.                                                                                                                     |  | Multistep Cooking: It is possible to set up to 3 cooking phases during the same recipe. Cooking technology, function, time and temperature can be varied. At the end of a phase, the following will start automatically.                |
|    | Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.                                                                                                   |  | Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.                        |
|    | Tilting grill: the tilting grill can be easily unhooked to move the heating element and clean the roof of the appliance in one simple step.                                                                         |  | Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.                                                                                                                                              |
|    | The capacity indicates the amount of usable space in the oven cavity in litres.                                                                                                                                     |  | Met deze functie kan je alle types gekookt voedsel warmhouden.                                                                                                                                                                          |
|  | INSTANT GO: activating this option allow to start cooking immediately. Preheating is included in the cooking time and the oven will gradually reach the desired temperature Particularly suitable for frozen foods. |                                                                                   |                                                                                                                                                                                                                                         |
