Technical Features

.5			
Minimum Temperature	30 °C	Heating suspended	Yes
Maximum temperature	280 °C	when door is opened	
No. of shelves	5	Door	Cool
N. of fans	1	Removable door	Yes
No. of lights	2	Full glass inner door	Yes
Light type	Halogen	Removable inner door	Yes
Light Power	40 W	Total no. of door glasses	4
Light when door is	Yes	Soft Close hinges	Yes
opened		Cooling system	Tangential
Lower heating element	1200 W	Cooling duct	Single
power		Speed Reduction	Yes
Upper heating element - Power	1000 W	Cooling System	
Grill element - power	1700 W	Usable cavity space	360x460x425 mm
Large grill - Power	2700 W	dimensions (HxWxD)	
Circular heating element	2000 W	Temperature control	Electronic
- Power		Cavity material	Ever clean Enamel

Performance / Energy Label

Energy efficiency class A+
Net volume of the cavity 70 l
Energy consumption per 1.09 KWh
cycle in conventional

mode

Energy consumption in conventional mode

3.92 MJ

Energy consumption in 2.45 MJ forced air convection

Energy consumption per 0.68 KWh

Electrical Connection

Plug Not present Voltage 220-240 V Current 13 A Nominal power Frequency (Hz) Power supply cable length 3000 W 50/60 Hz 115 cm

Compatible Accessories

BN620-1

Enamelled tray suitable for 45 cm and 60 cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

GTT

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

GTP

Pizza shovel with folding handle. Dimensions L31.5 x H32.5 cm. Easy and convenient to use and store. Perfect for serving pizza, bread and savory pastries in a safe and professional way.

PR3845X

Antifingerprint stainless steel. Cover for furniture in column installation of more ovens

Symbols glossary

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

A+: Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is quaranteed.

Air cooling system: to ensure a safe surface temperatures.

Defrost by time: Manual defrost function. At the end of the set duration, the function stops.

Defrost by weight: Automatic defrost function. You choose the type of food to defrost from the available categories (MEAT - FISH - BREAD - DESSERTS) After entering the weight of the food, the oven automatically defines the time required for proper defrosting.

Quadruple glazed: Number of glazed doors.

Automatic lighting deactivation: For greater energy savings, the lighting turns off automatically after one minute from the start of cooking The option can be disabled via the settings menu. In this case the light will remain on for the entire duration of cooking.

Electric

Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking

Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.

Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.

Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.

Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

	Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.	®	Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.
ECO	ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment		Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.
%	Fan grill: very intense heat coming only from above from a double heating element The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.	®	Turbo: the heat comes from 3 directions: above, below and from the back of the oven The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.
	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.		The inner door glass: can be removed with a few quick movements for cleaning.
्रें	KEEP_WARM_72dpi	Ó.	Side lights: Two opposing side lights increase visibility inside the oven.
w ECO logic	ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.		Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted
	Rapid preheating: cooking is preceded by the preheating phase which allows the cooking compartment to reach the set temperature. This option reduces the time by up to 50%.	i	SABBATH: function that allows to cook food respecting Judaism's day of rest provisions.
<u>.5</u>	The oven cavity has 5 different cooking levels.		Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.
	Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.	٥٢	Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 °C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.
V	Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.	70 it	The capacity indicates the amount of usable space in the oven cavity in litres.
79 lt	The capacity indicates the amount of usable space in the oven cavity in litres.
