

# SF6400S1PZXN

Category	60 cm
Product Family	Oven
Power supply	Electric
Heat source	ELECTRICITY
Cooking method	Thermo-ventilated
Cleaning system	Vapor Clean
Pizza Oven	Yes
EAN code	8017709350758

## Aesthetics

<b>Aesthetic</b>	Selezione	<b>Serigraphy type</b>	Symbols
<b>Colour</b>	Stainless steel	<b>Door</b>	Full glass
<b>Finishing</b>	Fingerproof	<b>Handle</b>	Selection squared
<b>Design</b>	Flat	<b>Handle Colour</b>	Steel effect
<b>Material</b>	Stainless steel	<b>Logo</b>	Silk screen
<b>Type of steel</b>	Brushed	<b>Control knobs</b>	Cucina restyling
<b>Glass Type</b>	Clear	<b>Controls colour</b>	Steel effect
<b>Serigraphy colour</b>	Black		

## Controls

			
<b>Display name</b>	DigiScreen	<b>Control setting</b>	Knobs & touch buttons
<b>Display technology</b>	LED	<b>No. of controls</b>	2

## Programs / Functions main oven

No. of cooking functions 9

Traditional cooking functions

 Static	 Fan assisted	 Circulaire
 Turbo	 Eco	 Large grill
 Fan grill (large)	 Fan assisted base	 Pizza

## Other functions

Direct Steam

Leavening

## Cleaning functions

Vapor Clean

## Options

Time-setting options	Automatic end cooking	Timer	1
Minute minder	Yes	Rapid pre-heating	Yes

## Technical Features

Capacity (Lt)	65 l	Circular heating element - Power	2000 W
Cavity	Sares	Door	Fresh Touch
Minimum Temperature	50 °C	Removable door	Yes
Maximum temperature	250 °C	Full glass inner door	Yes
No. of shelves	5	Removable inner door	Yes
N. of fans	1	Total no. of door glasses	3
No. of lights	1	Chimney	Fixed
Light type	Halogen	Cooling system	Tangential
User-replaceable light	Yes	Cooling duct	Double
Light Power	40 W	Speed Reduction Cooling System	Yes
Lower heating element power	1100 W	Usable cavity space dimensions (HxWxD)	331x460x412 mm
Upper heating element - Power	1000 W	Temperature control	Electro-mechanical
Grill element - power	1700 W	Cavity material	Ever clean Enamel
Large grill - Power	2700 W		

## Performance / Energy Label

Energy efficiency class	A	Energy consumption in forced air convection	2.81 MJ
Net volume of the cavity	65 l	Energy consumption per cycle in fan-forced convection	0.78 kWh
Energy consumption per cycle in conventional mode	1.09 kWh	Number of cavities	1
Energy consumption in conventional mode	3.92 MJ	Energy efficiency index	95.1 %

## Accessories included

Rack with back stop	1
---------------------	---

Enamelled deep tray 1  
(40mm)

Pizza Accessories

Refractory stone (round without handles) + cover

## Electrical Connection

<b>Voltage</b>	220-240 V	<b>Nominal power</b>	3000 W
<b>Plug</b>	Not present	<b>Frequency (Hz)</b>	50/60 Hz
<b>Current</b>	13 A	<b>Power supply cable length</b>	150 cm

## Compatible Accessories

### BN620-1

Enamelled tray suitable for 45 cm and 60 cm ovens. Depth 20 mm. Perfect for a wide range of savoury and sweet baking.

### GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### PALPZ

Pizza shovel with folding handle. Dimensions L31.5 x H32.5 cm. Easy and convenient to use and store. Perfect for serving pizza, bread and savory pastries in a safe and professional way.

### STONE2

Rectangular pizza stone without handles, suitable for 45cm and 60cm wide ovens. Dimensions W42 x H1.8 x D37.5cm. Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits

### BN640

Enamelled tray suitable for 45cm and 60cm ovens. Depth 540 mm. Perfect for cooking and roasting meat and fish in sauces. Also ideal for experimenting with lighter and crunchy side dishes

### GTT

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### PR3845X

Antifingerprint stainless steel. Cover for furniture in column installation of more ovens

## Symbols glossary

 Energy efficiency class A	 Air cooling system: to ensure a safe surface temperatures.
 A DIRECT STEAM oven has 1 steam cooking function to which the user can MANUALLY add steam. The function is activated when the user turns the function.	 4.3 inch display with LED technology, usability with knobs + 3 touch keys
 Triple glazed doors: Number of glazed doors.	 Electric
 Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength. Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking.	 Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.
 Fan assisted base: the mix of fan and lower heating element alone allows to finish cooking foods already cooked on the surface but not internally more quickly. This system is recommended to finish cooking foods that are already well cooked on the surface, but not internally, which therefore require a moderate higher heat. Ideal for any type of food.	 Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.
 Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.	 Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly. The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.
 ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment.	 Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.

- 
-  Fan grill: very intense heat coming only from above from a double heating element. The fan is active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat.
-  Turbo: the heat comes from 3 directions: above, below and from the back of the oven. The fan is active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking.
-  The inner door glass: can be removed with a few quick movements for cleaning.
-  Pizza function: Some ovens have an exclusive "Pizza" function which provides direct contact of the refractory stone for cooking pizza with low heating element. This allows cooking pizza in just 3 - 5 minutes, depending on the filling. This function is also ideal for cooking pies, baked fish and vegetables.
-  Rapid preheating: cooking is preceded by the preheating phase which allows the cooking compartment to reach the set temperature. This option reduces the time by up to 50%.
-  Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.
-  The capacity indicates the amount of usable space in the oven cavity in litres.
-  Pizza function: Specific function for cooking pizza in a pan. It allows to obtain a pizza that is soft inside and crispy outside with the topping perfectly cooked, not dry and not burnt.
-  All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.
-  Side lights: Two opposing side lights increase visibility inside the oven.
-  Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted
-  The oven cavity has 5 different cooking levels.
-  The capacity indicates the amount of usable space in the oven cavity in litres.
